

**United States Government
Compendium of
Interagency and Associated Terms**

**(an unofficial guide to Department Dictionaries and other
terminology sources)
Washington DC, July 2017**

Intentionally Blank

PREFACE

1. Scope

The *US Government Compendium of Interagency and Associated Terms* (USG Compendium) identifies standard terminology experienced in cooperation activities of the Federal branches of government and their components. These organizational terms, together with their definitions, provide an overview of existing terminology for general understanding by all USG components. **This compendium is in itself not authoritative, but instead compiles authoritative definitions from a variety of authoritative sources as an aid to the USG.**

2. Purpose

This document was founded on the demand of the Joint Doctrine Interorganizational Clearinghouse participants/staff officers to improve communication and mutual understanding within the federal government to increase efficiencies among and between workforces. As identified in multiple fora (e.g. conferences, workshops), interagency representatives expressed the need for terms with definitions that have useful, consistent, inclusive and exclusive meaning. Starting with the Departments of Defense and Homeland Security Dictionaries, this document begins that discussion by inventorying organizational terms and definitions from both legislative (US Code) and executive branches of government (Department and Agency Strategic Plans). This document is not intended to be an all-inclusive compilation of interagency terms, nor does it recommend one term over others. It is to be used as a guide only, and in no event will it become a vehicle for establishing or interpreting policy or doctrine for unified action of the work forces. It is published with the understanding that it not be definitive of the mission or function of any of department. The terms and definitions are not binding to the US Government. This document not intended to be used as a legal document nor reflect all the relevant statutory provisions, regulations or other guidance. Since definitions are presented without context, readers are advised to go to the original source listed for context.

3. Application

This document can be used as an aid when preparing correspondence or documents (e.g. policy, strategy, doctrine, legal, advisory, and planning), or facilitating training, education, and exercises.

4. Format

The primary parts of the USG Compendium are:

- a. Explanatory notes.
- b. Part I - terms and definitions.
- c. Part II - thematic lists

5. Revision

Future editions of the USG Compendium will be updated based on upon properly formatted new or modified material submitted by individual departments and agencies to supporting editors of the Admissions Committee and by annual reviews according to demand. This document contains approximately 12,500 terms selected from a larger preliminary list. Each term was chosen for its interagency significance. This document does not attempt to replace a list of similar terms with a single definition. This collection did identify redundant terms with multiple definitions. Our evaluation is that organizations should consider pursuing legislative changes to identify a single and useful USG definition for broad and informative terms.

EXPLANATORY NOTES

1. Updates

Per guidance founded in the Joint Doctrine Interorganizational Clearinghouse directed Terminology Working Group, terminology changes to the USG Compendium (additions, modifications, or deletions of interagency terminology) are approved using one of the following methods:

- a. USG terminology proposals approved by the Editorial Staff from federal agencies and the National Security Council that include dictionaries, lexicons, and glossaries.
- b. USG terminology captured in senior level executive branch specific memoranda
- c. Approved administrative changes/updates by the Senior Editor.

2. Criteria

The USG Compendium reflects terms and definitions in Federal department dictionaries and other senior-level documents with standard terminology for interagency and associated use as well as in dedicated sections of laws and other relevant documents. Accordingly, the following standing operating procedure criteria determine the acceptability of terminology for inclusion in the USG Compendium:

- a. The term and definition are singled out in a dedicated section of organizational material.
- b. The term and definition does not cross reference other terms nor references/sends the reader to other locations for clarity outside of the term.
- c. It is understood that the reader will look beyond the term and definition at the original source to determine context.
- d. The terms and definition exist in organizational documents approved at a senior level of management.
- e. Terms and definitions must be unclassified and from unclassified sources so that all users can access original documents.

3. Structure

The USG Compendium is separated into two parts (I - alphabetization of terms, and II - thematic lists.) The requirement is on the reader to analyze individual terms by viewing the original source placed in the document following each term and definition before comparing with similar terms or using in other documents.

- a. Part I – Alphabetized list of generic and/or organizational terms.
- b. Part II - Four thematic lists are categorized as follows to expose readers to terms and definitions related to foreign and domestic activities:

1) Domestic Support - all-hazard emergency management (law enforcement; fire and medical health services related to preparedness, protection, mitigation, response, recovery and continuation of essential public and private services)

2) Domestic Support - homeland security (terrorism, intelligence, cybersecurity, critical infrastructure protection, national all-hazard emergency planning and response to include civil-military coordination)

3) Foreign Support - humanitarian and sustainable development assistance (foreign disaster response and humanitarian relief, youth, resilience and climate change as well as sectoral: health, EG, agriculture, education, DG et al.)

4) Foreign Support - stabilization and security assistance (fragility, defense and governance, counterterrorism, counter violent extremism, peace keeping operations, atrocity prevention, civil-military coordination and transition)

c. These themes are accompanied by three figures on coordination that show agreements interaction and potential cooperation between workforces:

1) Domestic Coordination - National Response Framework Emergency Support Functions

2) Domestic Coordination - National Disaster Recovery Framework Recovery Support Functions

3) Foreign Coordination - Notional United States Government Provide Support to Foreign United States Government Activities (potential structure for a United States Government International Response Force)

4. Shortened Word Forms

This version of the USG Compendium will not include shortened word forms (e.g. abbreviations, acronyms, and initialisms). For a condensed lists of interagency shortened forms see the DOD Dictionary (http://www.dtic.mil/doctrine/dod_Glossary/index.html) the FEMA Acronyms, Abbreviations & Terms (FAAT) List (https://www.fema.gov/pdf/plan/prepare/faatlist07_09.pdf), the Foreign Assistance Manual and associated Handbooks (<https://fam.state.gov/>), and the USAID Automated Directives System (ADS) (<https://www.usaid.gov/sites/default/files/documents/1868/glossary.pdf>).

base floodplain - area subject to inundation from a flood of a magnitude that occurs once every 100 years on the average a flood having a 1 percent chance of being equaled or exceeded in any given year.	(SOURCE - DHS, DHS Lexicon, Terms)
base gasoline - gasoline which meets the following specifications: API gravity 57.8 Sulfur, ppm 317, Color Purple, Benzene, vol. % 1.35, Reid vapor pressure 8.7, Drivability 1195, Antiknock, Index 87.3, Distillation, D-86 °F, IBP 92, 10% 126, 50% 219, 90% 327, EP 414, Hydrocarbon Type, Vol. % FIA, Aromatics 30.9, Olefins 8.2, Saturates 60.9.	(SOURCE - DOE, US Code 42, §7581.)
base market hog - a barrow or gilt for which no discounts are subtracted from and no premiums are added to the base price.	(SOURCE - USDA, US Code 7, §1635i.)
base operating support — Directly assisting, maintaining, supplying, and distributing support of forces at the operating location. Also called BOS.	(SOURCE - DOD, DOD Dictionary, JP 4-0)
base operating support-integrator — The designated Service component or joint task force commander assigned to synchronize all sustainment functions for a contingency base. Also called BOS-I.	(SOURCE - DOD, DOD Dictionary, JP 4-0)
base period - the allocation of indirect costs is the period in which such costs are incurred and accumulated for allocation to activities performed in that period. The base period normally should coincide with the governmental unit's fiscal year, but in any event, shall be so selected as to avoid inequities in the allocation of costs.	(SOURCE - White House, OMB, Circular A-87)
base period - the one-year period ending the June 30 before the beginning of a fiscal year.	(SOURCE - USDA, US Code 7, §518d.)
base plan — A type of operation plan that describes the concept of operations, major forces, sustainment concept, and anticipated timelines for completing the mission without annexes or time-phased force and deployment data. Also called BPLAN.	(SOURCE - DOD, DOD Dictionary, JP 5-0)
base price - the price paid for livestock, delivered at the packing plant, before application of any premiums or discounts, expressed in dollars per hundred pounds of carcass weight.	(SOURCE - USDA, US Code 7, §1635a.)
base rental rate -The base rental rate is the rental value of the quarters, before applying any administrative adjustments or charges for related facilities.	(SOURCE - White House, OMB, Circular A-45)
base support installation — A Department of Defense Service or agency installation within the United States and its territories tasked to serve as a base for military forces engaged in either homeland defense or defense support of civil authorities. Also called BSI.	(SOURCE - DOD, DOD Dictionary, JP 3-28)

Terms and Definitions

baseline - A starting point or initial value for a program or project measurement indicator.	(SOURCE - DOS/ USAID, FAM, 5 FAM 674)
baseline - the program as set following contract award and preliminary design review of the space and ground systems.	(SOURCE - DHS, US Code 33, §878a)
baseline - the projection of current-year levels of new budget authority, outlays, receipts, and the surplus or deficit into the budget year and the out years.	(SOURCE - Congress, US Code 2, §900)
baseline (maritime) - the line from which maritime zones and limits are measured. Examples of these limits include the territorial sea, contiguous zone, and exclusive economic zone. The spatial extent of the baseline is defined as ordinary low water, interpreted as mean lower low water, as depicted on National Ocean Service nautical charts and/ or appropriate supplemental information.	(SOURCE - White House, OMB, Circular No. A-16 Revised)
baseline [measure] - formally approved version of a configuration item, regardless of media, formally designated and fixed at a specific time during the configuration item's life cycle.	(SOURCE - DHS, DHS Lexicon, Terms)
baseline [plan] - approved plan for a project, plus or minus approved changes.	(SOURCE - DHS, DHS Lexicon, Terms)
baseline concentration - with respect to a pollutant, the ambient concentration levels which exist at the time of the first application for a permit in an area subject to this part, based on air quality data available in the Environmental Protection Agency or a State air pollution control agency and on such monitoring data as the permit applicant is required to submit. Such ambient concentration levels shall take into account all projected emissions in, or which may affect, such area from any major emitting facility on which construction commenced prior to January 6, 1975, but which has not begun operation by the date of the baseline air quality concentration determination. Emissions of sulfur oxides and particulate matter from any major emitting facility on which construction commenced after January 6, 1975, shall not be included in the baseline and shall be counted against the maximum allowable increases in pollutant concentrations established under this part.	(SOURCE - DOE, US Code 42, §7479.)
baseline configuration - Consists of the minimum information system security and operational controls required for Department information systems.	(SOURCE - DOS/ USAID, FAM, 12 FAM 091)
baseline costs — The continuing annual costs of military operations funded by the operations and maintenance and military personnel appropriations.	(SOURCE - DOD, DOD Dictionary, JP 1-06)
baseline gasoline - in the case of gasoline sold during the high ozone period ("summertime" and/ or as defined by the Administrator) a gasoline which meets the following specifications: BASELINE GASOLINE FUEL PROPERTIES, API Gravity 57.4, Sulfur, ppm 339, Benzene, % 1.53, RVP, psi 8.7, Octane, R+M/ 2 87.3, IBP, F 91, 10%, F 128, .50%, F 218, 90%, F 330, End Point, F 415, Aromatics, % 32.0, Olefins, % 9.2, Saturates, % 58.8.	(SOURCE - DOE, US Code 42, §7545.)
baseline goal - baseline cost, schedule, or performance goal against which actual work is measured.	(SOURCE - DHS, DHS Lexicon, Terms)
baseline level of protection - degree of security provided by the set of countermeasures identified facility security level which must be implemented any deviation must be justified by a risk assessment.	(SOURCE - DHS, DHS Lexicon, Terms)
baseline risk - current level of risk that takes into account existing risk mitigation measures.	(SOURCE - DHS, DHS Lexicon, Terms)
basic educational assistance - educational assistance provided under subchapter II of this chapter.	(SOURCE - DVA, US Code 38, §3002.)

basic encyclopedia — A compilation of identified installations and physical areas of potential significance as objectives for attack. Also called BE.	(SOURCE - DOD, DOD Dictionary, JP 2-01)
basic health services - (A) physician services (including consultant and referral services by a physician); (B) inpatient and outpatient hospital services; (C) medically necessary emergency health services; (D) short-term (not to exceed twenty visits), outpatient evaluative and crisis intervention mental health services; (E) medical treatment and referral services (including referral services to appropriate ancillary services) for the abuse of or addiction to alcohol and drugs; (F) diagnostic laboratory and diagnostic and therapeutic radiologic services; (G) home health services; and (H) preventive health services (including (i) immunizations, (ii) well-child care from birth, (iii) periodic health evaluations for adults, (iv) voluntary family planning services, (v) infertility services, and (vi) children's eye and ear examinations conducted to determine the need for vision and hearing correction).	(SOURCE - DHHS, US Code 42, §300e-)
basic load — The quantity of supplies required to be on hand within, and which can be moved by, a unit or formation, expressed according to the wartime organization of the unit or formation and maintained at the prescribed levels.	(SOURCE - DOD, DOD Dictionary, JP 4-09)
basic pay - Basic pay for GS employees is a position's annual salary plus any other applicable civilian employee pay entitlements. Basic pay for FWS employees is a position's annual wages including shift differential pay and environmental pay, plus any other applicable civilian employee pay entitlements. Examples of other civilian employee pay entitlements include, but are not limited to, night differential pay for FWS employees, environmental differential pay, and premium pay (for civilian employee fire fighters and law enforcement officers).	(SOURCE - White House, OMB, Circular A-76)
basic pay - Compensation upon which TSP deduction and contribution are computed is base pay inclusive of any locality-based comparability or interim geographic adjustment or special law enforcement adjustment under the Federal Employees Pay Comparability Act of 1990, respectively. Also include any standby pay, administratively uncontrollable overtime (AUO), law enforcement availability pay (LEAP), physicians comparability allowance (PCA), tropical differential on the Isthmus of Panama, and for Federal Wage Schedule (FWS) employees night differential, environmental differential, and Guam recruitment differential. Basic pay for TSP purposes is the same amount used to determine the mandatory retirement deductions.	(SOURCE - DOS/ USAID, FAH, 4 FAH-3 H-546.2)
basic pay - rate of compensation exclusive of awards, bonuses, and differentials.	(SOURCE - DHS, DHS Lexicon, Terms)
basic research - research normally conducted without specific applications toward processes or products in mind.	(SOURCE - DHS, DHS Lexicon, Terms)
basic research - that research directed toward increasing knowledge in science. The primary aim of basic research is a fuller knowledge or understanding of the subject under study, rather than any practical application of that knowledge.	(SOURCE - GSA/ DOD, FAR, VOL I CH A)
basic salary - the salary fixed by law or administrative action before deductions and exclusive of additional compensation (such as NATO pay) of any kind. Basic salary excludes premium pay for overtime, night, Sunday, and holiday work, allowances, post and special differentials, and charge pay. It includes locality pay for participants in FSRDS, FSRDS Offset, and FSPS who are assigned to positions in the United States where locality pay is authorized.	(SOURCE - DOS/ USAID, FAM, 3 FAM 6113)
basic seed - the seed planted to produce certified or commercial seed.	(SOURCE - USDA, US Code 7, §2401.)
basic skills deficient - with respect to an individual— (A) who is a youth, that the individual has English reading, writing, or computing skills at or below the 8th grade level on a generally accepted	(SOURCE - DOL, US Code 29,

standardized test; or (B) who is a youth or adult, that the individual is unable to compute or solve problems, or read, write, or speak English, at a level necessary to function on the job, in the individual's family, or in society.	§3102)
basic training - level of training designed to provide elementary knowledge for entry level personnel who have little or no previous background, experience, or formal preparation.	(SOURCE - DHS, DHS Lexicon, Terms)
basic work requirement - The number of hours, excluding overtime hours, an employee is required to work or to account for by charging leave, credit hours, excused absence, holiday hours, compensatory time off, or time off as an award. A full-time employee has a basic work requirement of 80 hours in a pay period.	(SOURCE - DOS/ USAID, FAM, 3 FAM 2331.3)
basis level - the agreed-on adjustment to a future price to establish the final price paid for livestock.	(SOURCE - USDA, US Code 7, §1635a.)
basis of estimate - rationale that supports the estimate of cost of an activity, or the document that describes that rationale.	(SOURCE - DHS, DHS Lexicon, Terms)
battalion landing team — In an amphibious operation, an infantry battalion normally reinforced by necessary combat and service elements; the basic unit for planning an assault landing. Also called BLT.	(SOURCE - DOD, DOD Dictionary, JP 3-02)
battery backup - electrical apparatus that provides power to a load when the normal input power source fails is kept fully charged for use during a primary power failure.	(SOURCE - DHS, DHS Lexicon, Terms)
battle damage assessment — The estimate of damage composed of physical and functional damage assessment, as well as target system assessment, resulting from the application of lethal or nonlethal military force. Also called BDA. See also combat assessment.	(SOURCE - DOD, DOD Dictionary, JP 3-0)
battle damage repair — Essential repair, which may be improvised, carried out rapidly in a battle environment in order to return damaged or disabled equipment to temporary service. Also called BDR.	(SOURCE - DOD, DOD Dictionary, JP 4-09)
battle injury — Damage or harm sustained by personnel during or as a result of battle conditions. Also called BI.	(SOURCE - DOD, DOD Dictionary, JP 4-02)
battle management — The management of activities within the operational environment based on the commands, direction, and guidance given by appropriate authority.	(SOURCE - DOD, DOD Dictionary, JP 3-01)
battlefield coordination detachment — An Army liaison located in the air operations center that provides selected operational functions between the Army forces and the air component commander. Also called BCD. See also air operations center; liaison.	(SOURCE - DOD, DOD Dictionary, JP 3-03)
baud rate - Rate at which packets of data are sent and received through the network. These rates are defined in terms of bps. The higher the baud rate, the faster the connection.	(SOURCE - DOS/ USAID, FAH, 5 FAH-8 H-116)
bayesian probability - process of evaluating the probability of a hypothesis through 1) the specification of a prior probability and 2) modification of the prior probability by incorporation of observed information to create an updated posterior probability	(SOURCE - DHS, DHS Lexicon, Terms)
beach — 1. The area extending from the shoreline inland to a marked change in physiographic form or material, or to the line of permanent vegetation (coastline). 2. In amphibious operations, that portion of the shoreline designated for landing of a tactical organization.	(SOURCE - DOD, DOD Dictionary, JP 3-02)

beach party — The Navy component of the landing force support party under the tactical control of the landing force support party commander. See also beachmaster unit; shore party.	(SOURCE - DOD, DOD Dictionary, JP 3-02)
beach support area — In amphibious operations, the area to the rear of a landing force or elements thereof, that contains the facilities for the unloading of troops and materiel and the support of the forces ashore. Also called BSA.	(SOURCE - DOD, DOD Dictionary, JP 3-02)
beachhead — A designated area on a hostile or potentially hostile shore that, when seized and held, ensures the continuous landing of troops and materiel, and provides maneuver space requisite for subsequent projected operations ashore.	(SOURCE - DOD, DOD Dictionary, JP 3-02)
beachmaster unit — A commissioned naval unit of the naval beach group designed to provide to the shore party a Navy component known as a beach party, which is capable of supporting the amphibious landing of one division (reinforced). Also called BMU. See also beach party; naval beach group; shore party.	(SOURCE - DOD, DOD Dictionary, JP 4-01.6)
begin morning civil twilight — The period of time at which the sun is halfway between beginning morning and nautical twilight and sunrise, when there is enough light to see objects clearly with the unaided eye. Also called BMCT.	(SOURCE - DOD, DOD Dictionary, JP 2-01.3)
begin morning nautical twilight — The start of that period where, in good conditions and in the absence of other illumination, the sun is 12 degrees below the eastern horizon and enough light is available to identify the general outlines of ground objects and conduct limited military operations. Also called BMNT.	(SOURCE - DOD, DOD Dictionary, JP 3-09.3)
beginning farmer or rancher - a farmer or rancher who has not actively operated and managed a farm or ranch with a bona fide insurable interest in a crop or livestock as an owner-operator, landlord, tenant, or sharecropper for more than 5 crop years, as determined by the Secretary. bio-based material - material made from substances derived from living matte.	(SOURCE - DHS, DHS Lexicon, Terms)
biobased product - a product determined by the U.S. Department of Agriculture to be a commercial or industrial product (other than food or feed) that is composed, in whole or in significant part, of biological products, including renewable domestic agricultural materials and forestry materials.	(SOURCE - GSA/ DOD, FAR, VOL I CH A)
biobased product - a product determined by the Secretary to be a commercial or industrial product (other than food or feed) that is— (A) composed, in whole or in significant part, of biological products, including renewable domestic agricultural materials and forestry materials; or (B) an intermediate ingredient or feedstock.	(SOURCE - USDA, US Code 7, §8101.)
bio-based product - commercial or industrial product (other than food or feed) that utilizes biological products or renewable domestic agricultural (plant, animal, and marine) or forestry materials.	(SOURCE - DHS, DHS Lexicon, Terms)
biobased product — (A) an industrial product (including chemicals, materials, and polymers) produced from biomass; or (B) a commercial or industrial product (including animal feed and electric power) derived in connection with the conversion of biomass to fuel.	(SOURCE - USDA, US Code 7, §8108.)
biobased product manufacturing - development, construction, and retrofitting of technologically new commercial-scale processing and manufacturing equipment and required facilities that will be used to convert renewable chemicals and other biobased outputs of biorefineries into end-user products on a commercial scale.	(SOURCE - USDA, US Code 7, §8103.)
biocontainment plan - plan describing the containment procedures commensurate with the risk of working with any particular biological material should consider the standards and guidelines established by all appropriate authorities.	(SOURCE - DHS, DHS Lexicon, Terms)
bioenergy - fuel grade ethanol and other biofuel.	(SOURCE - USDA, US Code 7, §8110.)
bioenergy producer - a producer of bioenergy that uses an eligible commodity to produce bioenergy.	(SOURCE - USDA, US Code 7, §8110.)
bioengineering - refers to a food— (A) that contains genetic material that has been modified through in	(SOURCE - USDA,

vitro recombinant deoxyribonucleic acid (DNA) techniques; and (B) for which the modification could not otherwise be obtained through conventional breeding or found in nature.	US Code 7, §1639.)
biofuel - a fuel derived from renewable biomass.	(SOURCE - USDA, US Code 7, §8101.)
biological - relating to life, living organisms, or the materials derived from them.	(SOURCE - DHS, DHS Lexicon, Terms)
biological agent — A microorganism (or a toxin derived from it) that causes disease in personnel, plants, or animals or causes the deterioration of materiel. See also chemical agent.	(SOURCE - DOD, DOD Dictionary, JP 3-11)
biological agent - any micro-organism (including bacteria, viruses, fungi, rickettsia, or protozoa), pathogen, or infectious substance, and any naturally occurring, bioengineered, or synthesized component of any such micro-organism, pathogen, or infectious substance, whatever its origin or method of production, that is capable of causing— (1) death, disease, or other biological malfunction in a human, an animal, a plant, or another living organism; (2) deterioration of food, water, equipment, supplies, or materials of any kind; or (3) deleterious alteration of the environment.	(SOURCE - ODNI/ CIA/ DOD, US Code 50, §1514.)
biological agent - any micro-organism (including bacteria, viruses, fungi, rickettsiae or protozoa), pathogen, or infectious substance, or any naturally occurring, bio-engineered or synthesized component of any such micro-organism, pathogen, or infectious substance, whatever its origin or method of production, capable of causing— (1) death, disease, or other biological malfunction in a human, an animal, a plant, or another living organism; (2) deterioration of food, water, equipment, supplies, or materials of any kind; or (3) deleterious alteration of the environment. biomass - (A) any organic material grown for the purpose of being converted to energy; (B) any organic byproduct of agriculture (including wastes from food production and processing) that can be converted into energy; or (C) any waste material that can be converted to energy, is segregated from other waste materials, and is derived from— (i) any of the following forest-related resources: mill residues, precommercial thinnings, slash, brush, or otherwise nonmerchantable material; or (ii) wood waste materials, including waste pallets, crates, dunnage, manufacturing and construction wood wastes (other than pressure-treated, chemically-treated, or painted wood wastes), and landscape or right-of-way tree trimmings, but not including municipal solid waste, gas derived from the biodegradation of municipal solid waste, or paper that is commonly recycled.	(SOURCE - DOD/ DOJ, US Code 42, §16232)
biomass – (A) any organic matter which is available on a renewable basis, including agricultural crops and agricultural wastes and residues, wood and wood wastes and residues, animal wastes, municipal wastes, and aquatic plants. (B) For purposes of subchapter I, such term does not include municipal wastes; and for purposes of subchapter III, such term does not include aquatic plants and municipal wastes.	(SOURCE - DOE, US Code 42, §8802.)
biomass — any organic material that is available on a renewable or recurring basis, including—(AA) agricultural crops; (BB) trees grown for energy production; (CC) wood waste and wood residues; (DD) plants (including aquatic plants and grasses); (EE) residues; (FF) fibers; (GG) animal wastes and other waste materials; and (HH) fats, oils, and greases (including recycled fats, oils, and greases); and (bb) does not include— (AA) paper that is commonly recycled; or (BB) unsegregated	(SOURCE - DOC, US Code 15, §636.)

solid waste.	
biomass - total dry weight of all living organisms that can be supported at each tropic level in a food chain also, material that is biological in origin, including organic materials (both living and dead) from above and below ground (e.g., trees, crops, grasses, tree litter, roots, and animals and animal waste).	(SOURCE - DHS, DHS Lexicon, Terms)
biomass consumer cooperative - a consumer membership organization the purpose of which is to provide members with services or discounts relating to the purchase of biomass heating products or biomass heating systems.	(SOURCE - USDA, US Code 7, §8113.)
biomass conversion facility - a facility that converts or proposes to convert renewable biomass into— (A) heat; (B) power; (C) biobased products; or (D) advanced biofuels.	(SOURCE - USDA, US Code 7, §8101.)
Biomass Crop Assistance Program project area - an area that— (A) has specified boundaries that are submitted to the Secretary by the project sponsor and subsequently approved by the Secretary; (B) includes producers with contract acreage that will supply a portion of the renewable biomass needed by a biomass conversion facility; and (C) is physically located within an economically practicable distance from the biomass conversion facility. Also called BCAP project area.	(SOURCE - USDA, US Code 7, §8111.)
biomass energy — (A) biomass fuel; or (B) energy or steam derived from the direct combustion of biomass for the generation of electricity, mechanical power, or industrial process heat.	(SOURCE - DOE, US Code 42, §8802.)
biomass energy project - any facility (or portion of a facility) located in the United States which is primarily for (A) the production of biomass fuel (and byproducts); or (B) the combustion of biomass for the purpose of generating industrial process heat, mechanical power, or electricity (including cogeneration).	(SOURCE - DOE, US Code 42, §8802.)
biomass fuel - any gaseous, liquid, or solid fuel produced by conversion of biomass.	(SOURCE - DOE, US Code 42, §8802.)
biometric identifier - a technology that enables the automated identification, or verification of the identity, of an individual based on biometric information.	(SOURCE - DOT, US Code 49, §44903.)
biometric identifier information - the distinct physical or behavioral characteristics of an individual that are used for unique identification, or verification of the identity, of an individual.	(SOURCE - DOT, US Code 49, §44903.)
biometrics - A measurable physical characteristic or personal behavioral trait used to recognize the identity, or verify the claimed identity of an applicant. Facial images, fingerprints, and iris scan samples are examples of biometrics.	(SOURCE - DOS/ USAID, FAM, 12 FAM 091)
biometrics — The process of recognizing an individual based on measurable anatomical, physiological, and behavioral characteristics.	(SOURCE - DOD, DOD Dictionary, JP 2-0)
biometrics - to the measurable biological (anatomical and physiological) and behavioral characteristics that can be used for automated recognition; examples include fingerprint, face, and iris recognition. and other all-source for information concerning persons of interest. Also called BEI.	DOD Dictionary, JP 2-0)
biorefinery - a facility (including equipment and processes) that— (A) converts renewable biomass into biofuels and biobased products; and (B) may produce electricity.	(SOURCE - USDA, US Code 7, §8101.)
biosafety - Development and implementation of administrative policies, work practices, facility design, and safety equipment to prevent transmission of biologic agents to workers, other persons, and the environment.	(SOURCE - DHHS, National Health Security Review 2010-2014, Terms)
biosafety - underlying principles that seek the appropriate combination of facilities, equipment, and procedures for use in handling biological materials in order to protect the worker, the environment, and the community.	(SOURCE - DHS, DHS Lexicon, Terms)
biosafety level - combination of work practices, safety equipment, and facilities designed to minimize exposure to hazardous or infectious biological agents and toxins.	(SOURCE - DHS, DHS Lexicon, Terms)
biosafety officer - official responsible for the biosafety program at an individual DHS Component, facility, or sponsored research institution.	(SOURCE - DHS, DHS Lexicon, Terms)
biosafety plan - safety plan describing the biosafety and containment procedures commensurate with the risk of working with any particular biological material.	(SOURCE - DHS, DHS Lexicon, Terms)
biosecurity - Protection of high-consequence microbial agents and toxins, or critical relevant information, against theft or diversion by those who intend to pursue intentional misuse.	(SOURCE - DHHS, National Health Security Review 2010-2014, Terms)
biosurveillance - the process of gathering near real-time biological data that relates to human and zoonotic disease activity and threats to human or animal health, in order to achieve early warning and identification of such health threats, early detection and prompt ongoing tracking of health events, and overall situational awareness of disease activity.	(SOURCE - DHHS, US Code 42, §247d-4)
biosurveillance - The process of gathering, integrating, interpreting, and communicating essential information related to all-hazards threats or disease activity affecting human, animal, or plant health to achieve early detection and warning, contribute to overall situational awareness of the health aspects of an incident, and to enable better decision-making at all levels.	(SOURCE - DHHS, DHHS Quadrennial National Health Security Strategy Implementation Plan, 2015-2018, Terms)
bioterrorism - use of, or threatened use of, biological agents, such as manmade or natural disease pathogens, for terrorist purposes.	(SOURCE - DHS, DHS Lexicon, Terms)
bio-toxin - toxic substance produced by and derived from plants and animals.	(SOURCE - DHS, DHS Lexicon, Terms)
birth parents or parent - In the context of Convention adoption cases, birth parent means a natural parent as used in the INA.	(SOURCE - DOS/ USAID, FAM, 9 FAM 102.3-1 (U))
BLACK - Designation applied to encrypted information and the information systems, the associated areas, circuits, components, and equipment processing that information. See also RED.	(SOURCE - DOS/ USAID, FAM, 12 FAM 091)
Black Router Network - An Internet Protocol (IP)-based communications network. Multiple users can share a single BRN aggregate line. Black means the signal is bulk encrypted. See red/ black concept	(SOURCE - DOS/ USAID, FAH, 5 FAH-2 H-114)

blanket travel - A travel authorization (open authorization) that allows for travel over an extended period of time and/ or for multiple trips.	(SOURCE - DOS/ USAID, FAM, 14 FAM 511.3)
blasting accessory - devices and materials used in blasting includes; cap crimpers, tamping bags, blasting machines, blasting galvanometers, and det cord.	(SOURCE - DHS, DHS Lexicon, Terms)
blasting agent - any material or mixture, consisting of fuel and oxidizer, intended for blasting, not otherwise defined as an explosive: <i>Provided</i> , That the finished product, as mixed for use or shipment, cannot be detonated by means of a numbered 8 test blasting cap when unconfined.	(SOURCE - DOJ, US Code 18, §841)
blasting agent - explosive material which meet prescribed criteria for insensitivity to initiation.	(SOURCE - DHS, DHS Lexicon, Terms)
blasting cap/ detonator - device containing a sensitive explosive intended to produce a detonation wave can be either electric or non-electric (plain).	(SOURCE - DHS, DHS Lexicon, Terms)
blended learning - a formal education program that leverages both technology-based and face-to-face instructional approaches (A) that include an element of online or digital learning, combined with supervised learning time, and student-led learning, in which the elements are connected to provide an integrated learning experience; and (B) in which students are provided some control over time, path, or pace.	(SOURCE - ED, US Code 20, §7112.)
blind - an individual or class of individuals whose central visual acuity does not exceed 20/ 200 in the better eye with correcting lenses or whose visual acuity, if better than 20/ 200, is accompanied by a limit to the field of vision in the better eye to such a degree that its widest diameter subtends an angle of no greater than 20 degrees.	(SOURCE - DOD, US Code 41, §8501)
blind person - a person whose central visual acuity does not exceed 20/ 200 in the better eye with correcting lenses or whose visual acuity, if better than 20/ 200, is accompanied by a limit to the field of vision in the better eye to such a degree that its widest diameter subtends an angle of no greater than twenty degrees. In determining whether an individual is blind, there shall be an examination by a physician skilled in diseases of the eye, or by an optometrist, whichever the individual shall select. child - an unmarried child, under the age of 18 years, or such unmarried child regardless of age who, because of physical or mental disability incurred before age 18 is incapable of self-support. In addition to the offspring of the participant, the term includes - (a) An adopted child; (b) A stepchild or recognized natural child who received more than one-half support from the participant; and (c) A child who lived with and for whom a petition of adoption was filed by a participant, and who is adopted by the surviving spouse of the participant after the latter's death.	(SOURCE - DOS/ USAID, FAM, 3 FAM 6113)
child - an unmarried person under 21 years of age. a. Bases for Child Status - (1) INA lists seven categories of the term child; (2) Previously, the term child as used at INA (D) was interpreted to require a genetic connection between the child and the parent. However, such an interpretation did not adequately account for advances in assisted reproductive technology (ART). Consequently, a new policy was adopted in 2014 to allow birth mothers (also referred to as gestational mothers) who are also the legal parent of the child to be treated the same as genetic mothers for the purpose of qualifying for immigration benefits. The new policy is retroactive. If you encounter a case in which the child born abroad to a gestational and legal mother was previously denied an immigration benefit under prior interpretation, the child potentially would be eligible for an immigration benefit upon the submission of a new application accompanied by appropriate fees and sufficient evidence that he or she meets all relevant statutory and regulatory requirements. (A petition according preference status must be regarded as approved to accord immediate relative status if the beneficiary has been declared a child of the petitioner by private legislation. You should regard such a petition as approved for that purpose as of the date of the enactment of the private legislation or of the effective date stated in the language of the private law. Child Born Out of Wedlock - a. Child Through the Mother Under INA - (1) A child born out of wedlock is the child of the natural mother under INA. The natural mothers name on the child's birth certificate may be taken as proof of such relationship. (2) The term natural mother in INA includes a gestational mother who is the legal mother of a child at the time and place of birth, as well as genetic mother who is a legal mother of the child at the time and place of birth. Also see the note regarding assisted reproductive technology (ART) above in Bases for Child Status. b. Child Through the Father Under INA - (1) A child born out of wedlock is a child of the natural father under INA, provided the father has or had a bona fide parent-child relationship with the child. While an ongoing father-child relationship is not required to establish a bona fide parent or child relationship, you must ascertain whether a genuine parent or child relationship, not merely a tie by blood, exists or has existed at some point prior to the offspring's 21st birthday and while the offspring is or was unmarried. (2) While each case must be determined based on the facts presented, you must be satisfied that the facts demonstrate the existence of a bona fide parent or child relationship before the child's 21st birthday. For instance, although not necessary, the moral or emotional behavior of the father or child toward each other, which reflects the existence of such a relationship, may constitute favorable evidence of the relationship, just as cohabitation may be another element of evidence of such relationship. (3) Proof of present or former familial relationship may include the - (a) Fathers acknowledgment within the community that the child is his own; (b) Fathers support for the child's needs; and (c) Fathers active concern for child support, instruction,	(SOURCE - DOS/ USAID, FAM, 9 FAM 102.3-1 (U))

cost allocation plan - central service cost allocation plan, public assistance cost allocation plan, and indirect cost rate proposal.	(SOURCE - White House, OMB, Circular A-87)
cost avoidance - an action taken in the immediate time frame that will decrease costs in the future. For example, an engineering improvement that increases the mean time between failures and thereby decreases operation and maintenance costs is a cost avoidance action. Cost avoidance may be considered an additional benefit to quality or other non-quantifiable value engineering improvement.	(SOURCE - White House, OMB, Circular A-131)
cost center - A grouping of available services into a specific category, a cost center identifies the type of administrative services available to serviced agencies. Customers subscribe to services by cost center. The costs in a cost center are distributed in accordance with an agreed-upon distribution factor. Examples of cost centers include cashiering, accounts and records, vehicle maintenance, and travel services.	(SOURCE - DOS/ USAID, FAH, 6 FAH-5 H-041)
cost distribution system - A system where costs are pooled and then spread to service recipients using a distribution factor. Municipal taxes are a common example of a cost distribution system. Instead of pricing its services on a transaction basis (see cost accounting system), municipal government decides at the beginning of the year what level of fire protection services it can afford. It then estimates the total cost of the fire protection services and divides it among the taxpayers using a factor (typically a rate per \$1,000 of real estate value). Normally, the services in the firefighting cost center include extinguishing residential fires, chemical and other potentially toxic fires, vehicle fires, search and rescue, fire code enforcement and fire prevention/ education. While municipalities	(SOURCE - DOS/ USAID, FAH, 6 FAH-5 H-041)

publish the real estate tax rate, they do not provide a predictor or price for the services that a single taxpayer will receive during one year. A fortunate resident might pay taxes and support municipal firefighting for a lifetime without calling the fire department to put out a blaze. A less fortunate resident might be forced to call the fire department multiple times. Both, however, pay the same tax rate.	
cost estimate - (A) an assessment and quantification of all costs and risks associated with the acquisition of a major system based upon reasonably available information at the time the Director establishes the 2010 adjusted total acquisition cost for such system or restructures such system; and (B) does not mean an independent cost estimate. Dates for Filing Applications - Dates for Filing Applications are established by the Department to indicate, for Department purposes (these dates have separate significance regarding eligibility to file adjustment of status applications with DHS), when immigrant visa applicants should be notified to assemble and submit required documentation to the National Visa Center (NVC). The dates, which in general were previously called qualifying dates, reflect priority dates for filing visa applications within a timeframe justifying immediate action in the application process. The Dates for Filing Applications are published in the monthly Visa Bulletin starting in October 2015. Neither post nor the NVC will officially and pro-actively notify applicants of additional processing requirements until the Dates for Filing Applications encompasses the aliens priority date. This process helps to ensure that all documentation will be current and accurate by the time a visa number is available and authorized for issuance and to avoid delay in final action. electric motor vehicle - a motor vehicle primarily powered by an electric motor that draws current from rechargeable storage batteries, fuel cells, photovoltaic arrays, or other sources of electric current and may include an electric-hybrid vehicle.	(SOURCE - DOD/DOJ, US Code 42, §13435.)
electric strike - electro-mechanical access control device which secures or released the latch via applied current.	(SOURCE - DHS, DHS Lexicon, Terms)
electric utility steam generating unit - any fossil fuel fired combustion unit of more than 25 megawatts that serves a generator that produces electricity for sale. A unit that cogenerates steam and electricity and supplies more than one-third of its potential electric output capacity and more than 25 megawatts electrical output to any utility power distribution system for sale shall be considered an electric utility steam generating unit.	(SOURCE - DOE, US Code 42, §7412.)
electric vehicle - a vehicle which is powered by an electric motor drawing current from rechargeable storage batteries, fuel cells, or other portable sources of electrical current, and which may include a nonelectrical source of power designed to charge batteries and components thereof.	(SOURCE - DOC, US Code 15, §2502.)
electric-hybrid vehicle - vehicle primarily powered by an electric motor that draws current from rechargeable storage batteries, fuel cells, or other sources of electric current and also relies on a nonelectric source of power that also operates on or is capable of operating on a nonelectrical source of power.	(SOURCE - DOD/DOJ, US Code 42, §13435.)
electrified lockset - lock that is controlled electrically.	(SOURCE - DHS, DHS Lexicon, Terms)
electro-explosive device — An explosive or pyrotechnic component that initiates an explosive, burning, electrical, or mechanical train and is activated by the application of electrical energy. Also called EED.	(SOURCE - DOD, DOD Dictionary, JP 3-04)

electromagnetic battle management — The dynamic monitoring, assessing, planning, and directing of joint electromagnetic spectrum operations in support of the commander's scheme of maneuver. Also called EMBM.	(SOURCE - DOD, DOD Dictionary, JP 3-13.1)
electromagnetic compatibility — The ability of systems, equipment, and devices that use the electromagnetic spectrum to operate in their intended environments without causing or suffering unacceptable or unintentional degradation because of electromagnetic radiation or response. Also called EMC. See also electromagnetic spectrum; electromagnetic spectrum management; electronic warfare.	(SOURCE - DOD, DOD Dictionary, JP 3-13.1)
electromagnetic environment — The resulting product of the power and time distribution, in various frequency ranges, of the radiated or conducted electromagnetic emission levels encountered by a military force, system, or platform when performing its assigned mission in its intended operational environment. Also called EME.	(SOURCE - DOD, DOD Dictionary, JP 3-13.1)
electromagnetic environmental effects — The impact of the electromagnetic environment upon the operational capability of military forces, equipment, systems, and platforms. Also called E3.	(SOURCE - DOD, DOD Dictionary, JP 3-13.1)
electromagnetic hardening — Action taken to protect personnel, facilities, and/ or equipment by blanking, filtering, attenuating, grounding, bonding, and/ or shielding against undesirable effects of electromagnetic energy. See also electronic warfare.	(SOURCE - DOD, DOD Dictionary, JP 3-13.1)
electromagnetic interference — Any electromagnetic disturbance, induced intentionally or unintentionally, that interrupts, obstructs, or otherwise degrades or limits the effective performance of electronics and electrical equipment. Also called EMI.	(SOURCE - DOD, DOD Dictionary, JP 3-13.1)
electromagnetic intrusion — The intentional insertion of electromagnetic energy into transmission paths in any manner, with the objective of deceiving operators or of causing confusion. See also electronic warfare.	(SOURCE - DOD, DOD Dictionary, JP 3-13.1)
electromagnetic jamming — The deliberate radiation, reradiation, or reflection of electromagnetic energy for the purpose of preventing or reducing an enemy's effective use of the electromagnetic spectrum, and with the intent of degrading or neutralizing the enemy's combat capability. See also electromagnetic spectrum; electromagnetic spectrum management; electronic warfare.	(SOURCE - DOD, DOD Dictionary, JP 3-13.1)
electromagnetic lock - lock that uses an electrically actuated magnetic attraction to secure the door.	(SOURCE - DHS, DHS Lexicon, Terms)
electromagnetic operational environment — The background electromagnetic environment and the friendly, neutral, and adversarial electromagnetic order of battle within the electromagnetic area of influence associated with a given operational area. Also called EMOE.	(SOURCE - DOD, DOD Dictionary, JP 6-01)
electromagnetic pulse - 1 or more pulses of electromagnetic energy emitted by a device capable of disabling or disrupting operation of, or destroying, electronic devices or communications networks, including hardware, software, and data, by means of such a pulse.	(SOURCE - DOI, US Code 16, §824o-1)
electromagnetic pulse — The electromagnetic radiation from a strong electronic pulse, most commonly caused by a nuclear explosion that may couple with electrical or electronic systems to produce damaging current and voltage surges. Also called EMP. See also electromagnetic radiation.	(SOURCE - DOD, DOD Dictionary, JP 3-13.1)
electromagnetic radiation — Radiation made up of oscillating electric and magnetic fields and propagated with the speed of light.	(SOURCE - DOD, DOD Dictionary, JP 6-01)
electromagnetic radiation hazards —Transmitter or antenna installation that generates or increases electromagnetic radiation in the vicinity of ordnance, personnel, or fueling operations in excess of	(SOURCE - DOD, DOD Dictionary,

established safe levels.	JP 3-13.1)
electromagnetic spectrum — The range of frequencies of electromagnetic radiation from zero to infinity. It is divided into 26 alphabetically designated bands. See also electronic warfare.	(SOURCE - DOD, DOD Dictionary, JP 3-13.1)
electromagnetic spectrum control — The coordinated execution of joint electromagnetic spectrum operations with other lethal and nonlethal operations that enable freedom of action in the electromagnetic operational environment. Also called EMSC.	(SOURCE - DOD, DOD Dictionary, JP 3-13.1)
electromagnetic spectrum management — Planning, coordinating, and managing use of the electromagnetic spectrum through operational, engineering, and administrative procedures. See also electromagnetic spectrum.	(SOURCE - DOD, DOD Dictionary, JP 6-01)
electromagnetic vulnerability — The characteristics of a system that cause it to suffer a definite degradation (incapability to perform the designated mission) as a result of having been subjected to a certain level of electromagnetic environmental effects. Also called EMV.	(SOURCE - DOD, DOD Dictionary, JP 3-13.1)
electronic agent - a computer program or an electronic or other automated means used independently to initiate an action or respond to electronic records or performances in whole or in part without review or action by an individual at the time of the action or response.	(SOURCE - DOC, US Code 15, §7006)
electronic and information technology - information technology and any equipment or interconnected system or subsystem of equipment, that is used in the creation, conversion, or duplication of data or information. The term electronic and information technology includes, but is not limited to, telecommunications products (such as telephones), information kiosks and transaction machines, World Wide Web sites, multimedia, and office equipment such as copiers and fax machines. The term does not include any equipment that contains embedded information technology that is used as an integral part of the product, but the principal function of which is not the acquisition, storage, manipulation, management, movement, control, display, switching, interchange, transmission, or reception of data or information. For example, HVAC (heating, ventilation, and air conditioning) equipment such as thermostats or temperature control devices, and medical equipment where information technology is integral to its operation, is not information technology. Also called EIT.	(SOURCE - DOS/ USAID, FAM, 5 FAM 913)
electronic and information technology - has the same meaning as “information technology” but also includes any equipment or interconnected system or subsystem of equipment that is used in the creation, conversion, or duplication of data or information. The term EIT, includes, but is not limited to, telecommunication products (such as telephones), information kiosks and transaction machines, worldwide websites, multimedia, and office equipment (such as copiers and fax machines). Also called EIT.	(SOURCE - GSA/ DOD, FAR, VOL I CH A)
electronic and information technology - information technology including any equipment or interconnected system or subsystem used in the creation, conversion, or duplication of data or information includes, but is not limited to, software applications and operating systems, telecommunications products, information kiosks and transaction machines, Web sites (Internet, Intranet, and Extranet), video and multimedia products, desktop and portable computers, and office equipment such as copiers and fax machines.	(SOURCE - DHS, DHS Lexicon, Terms)
electronic attack — Division of electronic warfare involving the use of electromagnetic energy, directed energy, or antiradiation weapons to attack personnel, facilities, or equipment with the intent of degrading, neutralizing, or destroying enemy combat capability and is considered a form of fires. Also called EA. See also electronic protection; electronic warfare; electronic warfare support.	(SOURCE - DOD, DOD Dictionary, JP 3-13.1)
electronic benefit transfer contract - a contract that provides for the issuance, use, or redemption of program benefits in the form of electronic benefit transfer cards.	(SOURCE - USDA, US Code 7, §2016.)

Terms and Definitions

electronic commerce - electronic techniques for accomplishing business transactions including electronic mail or messaging, World Wide Web technology, electronic bulletin boards, purchase cards, electronic funds transfer, and electronic data interchange.	(SOURCE - GSA/ DOD, FAR, VOL I CH A)
electronic data interchange - a technique for electronically transferring and storing formatted information between computers utilizing established and published formats and codes, as authorized by the applicable Federal Information Processing Standards. Also called EDI.	(SOURCE - GSA/ DOD, FAR, VOL I CH A)
electronic data interchange system - any established mechanism approved by the Commissioner of U.S. Customs and Border Protection through which information can be transferred electronically.	(SOURCE - DHS, US Code 19, §1401)
electronic device - an electronic device is a cellular telephone, personal digital assistant (PDA), laptop computer, global positioning system (GPS), audio/ video players, and similar apparatuses used to communicate or to send, retrieve, store, or display information or data.	(SOURCE - DOS/ USAID, FAM, 6 FAM 1946.1-1)
electronic device - For purposes of this policy statement, an electronic device is a cellular telephone, personal digital assistant (PDA), laptop computer, global positioning system (GPS), audio/ video players, and similar apparatuses used to communicate or to send, retrieve, store, or display information or data.	(SOURCE - DOS/ USAID, FAM, 6 FAM 1946.1-1)
electronic dissemination - Information disseminated through electronic means, including but not limited to email distributions, social media, removable media like CD-ROM, or other technologies.	(SOURCE - DOS/ USAID, FAM, 3 FAM 4173)
electronic document - a document that is generated, sent, received, or stored by electronic, optical, or similar means, including electronic data interchange, electronic mail, telegram, telex, or telecopy.	(SOURCE - USDA, US Code 7, §241.)
electronic funds transfer - Any transfer of funds initiated through a terminal, telephone, computer or magnetic tape for the purpose of instructing or authorizing a financial institution to debit or credit an account. Also called EFT.	(SOURCE - DOS/ USAID, FAH, 4 FAH-2 H-131)
electronic funds transfer - any transfer of funds, other than a transaction originated by cash, check, or similar paper instrument, that is initiated through an electronic terminal, telephone, computer, or magnetic tape, for the purpose of ordering, instructing, or authorizing a financial institution to debit or credit an account. The term includes Automated Clearing House transfers, Fedwire transfers, and transfers made at automatic teller machines and point-of-sale terminals. Also called EFT.	(SOURCE - GSA/ DOD, FAR, VOL I CH A)
electronic funds transfer indicator - a four character suffix to the unique entity identifier. The suffix is assigned at the discretion of the commercial, nonprofit, or Government entity to establish additional System for Award Management records for identifying alternative EFT accounts. Also called EFT indicator.	(SOURCE - GSA/ DOD, FAR, VOL I CH A)
Electronic Government Program Board - An advisory entity to the Under Secretary for Management that addresses the full range of Department E-Government and IT investment portfolio and project management activities. Also called E-GovPB.	(SOURCE - DOS/ USAID, FAM, 5 FAM 674)
electronic health record - A digital version of a patient's paper chart. Also called ER	(SOURCE - DHHS, DHHS Quadrennial National Health Security Strategy Implementation Plan, 2015-2018, Terms)
electronic health records - In their simplest form, digital versions of patients' paper charts, also called Electronic Patient Care Records (ePCR). More broadly, EHR refers to an integrated dataset that	(SOURCE - DOT/ NHTSA, Beyond

includes the patient's medical history and treatment across multiple providers and allows for interoperability among various electronic systems. Also called EHR.	EMS Data Collection, Terms)
electronic initiator - initiator controlled or operated by the controlled flow of electrons.	(SOURCE - DHS, DHS Lexicon, Terms)
electronic intelligence — Technical and geolocation intelligence derived from foreign noncommunications electromagnetic radiations emanating from other than nuclear detonations or radioactive sources. Also called ELINT. See also electronic warfare; foreign instrumentation signals intelligence; intelligence; signals intelligence.	(SOURCE - DOD, DOD Dictionary, JP 3-13.1)
electronic mail - Information created or received on an electronic mail system includes: brief notes, more formal or substantive narrative documents, and any attachments, such as word processing and other electronic documents, that may be transmitted with the message.	(SOURCE - DHS, DHS Lexicon, Terms)
electronic mail - The process or result of sending and receiving messages via telecommunications links between computer terminals. Also called email.	(SOURCE - DOS/ USAID, FAH, 5 FAH-1 H-114)
electronic masking — The controlled radiation of electromagnetic energy on friendly frequencies in a manner to protect the emissions of friendly communications and electronic systems against enemy electronic warfare support measures/ signals intelligence without significantly degrading the operation of friendly systems.	(SOURCE - DOD, DOD Dictionary, JP 3-13.1)
electronic object - An electronic object is a file that may contain documents, images, data, e-mail, etc. As used in this policy, electronic objects may be signed to authenticate the originator and provide a means to determine if the content has been changed subsequent to signing. Electronic objects may also be encrypted to protect the content from unauthorized access.	(SOURCE - DOS/ USAID, FAM, 5 FAM 142.4)
electronic probing — Intentional radiation designed to be introduced into the devices or systems of potential enemies for the purpose of learning the functions and operational capabilities of the devices or systems.	(SOURCE - DOD, DOD Dictionary, JP 3-13.1)
electronic product - (A) any manufactured or assembled product which, when in operation, (i) contains or acts as part of an electronic circuit and (ii) emits (or in the absence of effective shielding or other controls would emit) electronic product radiation, or (B) any manufactured or assembled article which is intended for use as a component, part, or accessory of a product described in clause (A) and which when in operation emits (or in the absence of effective shielding or other controls would emit) such radiation.	(SOURCE - USDA, US Code 21, §360hh)
electronic product environmental assessment tool - system to help purchasers evaluate, compare, and select desktop computers, notebooks, and monitors based on their environmental attributes.	(SOURCE - DHS, DHS Lexicon, Terms)
electronic product radiation – (A) any ionizing or non-ionizing electromagnetic or particulate radiation, or (B) any sonic, infrasonic, or ultrasonic wave, which is emitted from an electronic product as the result of the operation of an electronic circuit in such product.	(SOURCE - USDA, US Code 21, §360hh)
electronic protection — Division of electronic warfare involving actions taken to protect personnel, facilities, and equipment from any effects of friendly or enemy use of the electromagnetic spectrum that degrade, neutralize, or destroy friendly combat capability. Also called EP. See also electronic attack, electronic warfare; electronic warfare support.	(SOURCE - DOD, DOD Dictionary, JP 3-13.1)
electronic receipt - a receipt that is authorized by the Secretary to be issued or transmitted under this chapter in the form of an electronic document.	(SOURCE - USDA, US Code 7, §241.)

Terms and Definitions

electronic reconnaissance — The detection, location, identification, and evaluation of foreign electromagnetic radiations. See also electromagnetic radiation; reconnaissance.	(SOURCE - DOD, DOD Dictionary, JP 3-13.1)
electronic record - information that is recorded in a form that only a computer can process not necessarily kept in a “recordkeeping system” but may reside in a generic electronic information system or are produced by an application such as word processing or electronic mail.	(SOURCE - DHS, DHS Lexicon, Terms)
electronic records - Numerical, graphical, and textual information recorded on any medium capable of being read by a computer. Electronic records include, but are not limited to, records stored on-line or on off-line media such as tapes, disks, and optical disks.	(SOURCE - DOS/ USAID, FAM, 5 FAM 415.1)
electronic records - Records that include numerical, graphical, and textual information recorded on any medium capable of being read by a computer. This includes, but is not limited to, both on-line storage and off-line media such as tapes, disks, and optical disks.	(SOURCE - DOS/ USAID, FAH, 5 FAH-4 H-113)
electronic records management - utilization of automated techniques to manage records regardless of format.	(SOURCE - DHS, DHS Lexicon, Terms)
electronic records system - Any information system that produces, manipulates, stores, or transfers federal records by using a computer.	(SOURCE - DOS/ USAID, FAH, 5 FAH-4 H-113)
electronic signature - a method of signing an electronic message that - (1) Identifies and authenticates a particular person as the source of the electronic message; and (2) Indicates such persons approval of the information contained in the electronic message.	(SOURCE - DOS/ USAID, FAM, 5 FAM 142.4)
electronic signature - The process of applying any mark in electronic form with the intent to sign a data object. See also digital signature.	(SOURCE - DOS/ USAID, FAM, 12 FAM 091)
electronic signature (E-Signs) - GPEA defines electronic signature as a method of signing an electronic message that - (1) Identifies and authenticates a particular person as the source of the electronic message; and (2) Indicates such person's approval of the information contained in the electronic message.	(SOURCE - DOS/ USAID, FAM, 5 FAM 613)
electronic surveillance - acquisition of a nonpublic communication by electronic means without the consent of a person who is a party to an electronic communication or, in the case of a nonelectronic communication, without the consent of a person who is visibly present at the place of communication, but not including the use of radio direction-finding equipment solely to determine the location of a transmitter.	(SOURCE - ODNI/ CIA/ DOD, US Code 50, §3001)
electronic surveillance - acquisition of a non-public communication by electronic means without the consent of a person who is a party to an electronic communication in the case of a non-electronic communication, without the consent of a person who is visibly present at the place of communication, but not including the use of radio-finding equipment solely to determine the location of a transmitter.	(SOURCE - DHS, DHS Lexicon, Terms)
electronic timing switch - timing switch using a commercial or improvised electronic timer or integrated circuit to start the initiation train.	(SOURCE - DHS, DHS Lexicon, Terms)
electronic trading facility - a trading facility that: (A) operates by means of an electronic or telecommunications network; and (B) maintains an automated audit trail of bids, offers, and the matching of orders or the execution of transactions on the facility.	(SOURCE - USDA, US Code 7, §1a.)
electronic warfare — Military action involving the use of electromagnetic and directed energy to control the electromagnetic spectrum or to attack the enemy. Also called EW. See also directed energy;	(SOURCE - DOD, DOD Dictionary, JP 3-13.1)

electromagnetic spectrum; electronic attack; electronic protection; electronic warfare support.	
electronic warfare frequency deconfliction — Actions taken to integrate those frequencies used by electronic warfare systems into the overall frequency deconfliction process. See also electronic warfare.	(SOURCE - DOD, DOD Dictionary, JP 3-13.1)
electronic warfare reprogramming — The deliberate alteration or modification of electronic warfare or target sensing systems, or the tactics and procedures that employ them, in response to validated changes in equipment, tactics, or the electromagnetic environment. See also electronic warfare.	(SOURCE - DOD, DOD Dictionary, JP 3-13.1)
electronic warfare support — Division of electronic warfare involving actions tasked by, or under direct control of, an operational commander to search for, intercept, identify, and locate or localize sources of intentional and unintentional radiated electromagnetic energy for the purpose of immediate threat recognition, targeting, planning and conduct of future operations. Also called ES. See also electronic attack; electronic protection; electronic warfare.	(SOURCE - DOD, DOD Dictionary, JP 3-13.1)
electronics security — The protection resulting from all measures designed to deny unauthorized persons information of value that might be derived from their interception and study of noncommunications electromagnetic radiations, e.g., radar.	(SOURCE - DOD, DOD Dictionary, JP 3-13.1)
electro-optical-infrared countermeasure — A device or technique employing electro-optical-infrared materials or technology that is intended to impair the effectiveness of enemy activity, particularly with respect to precision guided weapons and sensor systems. Also called EO-IR CM.	(SOURCE - DOD, DOD Dictionary, JP 3-13.1)
element — An organization formed around a specific function within a designated directorate of a joint force commander's headquarters.	(SOURCE - DOD, DOD Dictionary, JP 3-33)
element of the defense acquisition system - an organization that employs members of the acquisition workforce, carries out acquisition functions, and focuses primarily on acquisition.	(SOURCE - DOD, US Code 10, §2545)
elementary school - a day or residential school which provides elementary education, as determined under State law.	(SOURCE - DOL, US Code 29, §152)
elephant - any animal of the species <i>loxodonta Africana</i> .	(SOURCE - DOI, US Code 16, §4244)
elevated causeway system — An elevated causeway pier that provides a means of delivering containers, certain vehicles, and bulk cargo ashore without the lighterage contending with the surf zone. Also called ELCAS. See also causeway.	(SOURCE - DOD, DOD Dictionary, JP 4-01.6)
elevated improvised explosive device - improvised explosive device (IED) emplaced above the surface: hanging from an overpass, on a roof, etc.	(SOURCE - DHS, DHS Lexicon, Terms)
elevation bathymetric - The bathymetric data for Inland and Intercoastal waterways is highly accurate bathymetric sounding information collected to ensure that federal navigation channels are maintained to their authorized depths. Bathymetric survey activities support the Nation's critical nautical charting program. This data is also used to create Electronic Navigational Charts. The bathymetric sounding data supports the elevation layer of the geospatial data framework.	(SOURCE - White House, OMB, Circular No. A-16 Revised)
elevation terrestrial - This data contains georeferenced digital representations of terrestrial surfaces, natural or manmade, which describe vertical position above or below a datum surface. Data may be encapsulated in an evenly spaced grid (raster form) or randomly spaced (triangular irregular network, hypsography, single points). The elevation points can have varying horizontal and vertical resolution and accuracy.	(SOURCE - White House, OMB, Circular No. A-16 Revised)

Terms and Definitions

elicitation — In intelligence usage, the acquisition of information from a person or group in a manner that does not disclose the intent of the interview or conversation.	(SOURCE - DOD, DOD Dictionary, JP 2-0)
eligibility determination [security] - determinations of eligibility for access to classified information based on criteria established under E.O. 12968.	(SOURCE - DHS, DHS Lexicon, Terms)
eligibility for access to classified information - the result of the determination whether an employee (a) is eligible for access to classified information in accordance with Executive Order 12968 (relating to access to classified information), or any successor thereto, and Executive Order 10865 of February 20, 1960, as amended (relating to safeguarding classified information with industry), or any successor thereto; and (b) possesses a need to know under such orders.	(SOURCE - White House, PPD 19 Protecting Whistleblowers with Access to Classified , Terms)
eligible agency - the sole entity or agency in a State or an outlying area responsible for administering or supervising policy for adult education and literacy activities in the State or outlying area, respectively, consistent with the law of the State or outlying area, respectively.	(SOURCE - DOL, US Code 29, §3272.)
eligible Aleut - any Aleut living on August 10, 1988— (A) who, as a civilian, was relocated by authority of the United States from his or her home village on the Pribilof Islands or the Aleutian Islands west of Unimak Island to an internment camp, or other temporary facility or location, during World War II; or (B) who was born while his or her natural mother was subject to such relocation.	(SOURCE - ODNI/ CIA/ DOD, US Code 50, §4232)
eligible crop - a crop of renewable biomass.	(SOURCE - USDA, US Code 7, §8111.)
eligible dependent - a spouse, surviving spouse, child, or dependent parent of a person who served in the active military, naval, or air service.	(SOURCE - DVA, US Code 38, §6301.)
eligible domestic entity - a manufacturer or producer in the United States, or a certified union or recognized union or group of workers which is representative of an industry in the United States, that manufactures or produces short life cycle merchandise that is— (A) like or directly competitive with other merchandise that is the subject of 2 or more affirmative dumping determinations, or (B) is similar enough to such other merchandise as to be considered for inclusion with such merchandise in a product monitoring category.	(SOURCE - DHS, US Code 19, §1673b.)
eligible entity - a State or local government, nonprofit corporation, educational agency, community development organization, or other entity that agrees to comply with the conditions established.	(SOURCE - DHS/ USCG, US Code 14, §92)
eligible export vessel - a vessel that— (A) is constructed, reconstructed, or reconditioned in the United States for use in world-wide trade; and (B) will, on delivery or redelivery, become or remain documented under the laws of a country other than the United States.	(SOURCE - DOT/ Maritime, US Code 46, §53701)
eligible family member - A family member who is residing at the sponsoring employees post of assignment abroad and is counted as a dependent under ICASS.	(SOURCE - DOS/ USAID, FAM, 14 FAM 715)
eligible family member or dependent - a U.S. citizen spouse or dependent of a U.S. Federal Government employee or U.S. military service member, either residing with the sponsor (see paragraph k below) or residing overseas apart from the sponsor solely because the employing agency does not authorize family members to reside at the sponsors current post of assignment. EFMs who voluntarily reside overseas at posts other than the sponsors post of assignment are considered U.S. citizen residents for purposes of employment under this regulation. Also called EFM.	(SOURCE - DOS/ USAID, FAM, 3 FAM 8221.3)
eligible grantee - a local government or municipality, peoples' utility district, irrigation district, and	(SOURCE - USDA, US Code 7,

cooperative, nonprofit, or limited-dividend association in a rural area.	§918c.)
eligible hospital - a hospital that the Secretary determines has a high rate of risk adjusted readmissions for the conditions and has not taken appropriate steps to reduce such readmissions and improve patient safety as evidenced through historically high rates of readmissions, as determined by the Secretary.	(SOURCE - DHHS, US Code 42, §280j-3)
eligible individual - an individual— (A) who has attained 16 years of age; (B) who is not enrolled or required to be enrolled in secondary school under State law; and (C) who—(i) is basic skills deficient;(ii) does not have a secondary school diploma or its recognized equivalent, and has not achieved an equivalent level of education; or(iii) is an English language learner.	(SOURCE - DOL, US Code 29, §3272.)
eligible individual (in reference to enrollment in burn pit registry) - any individual who, on or after September 11, 2001: (A) was deployed in support of a contingency operation while serving in the Armed Forces; and (B) during such deployment, was based or stationed at a location where an open burn pit was used.	(SOURCE - DVA, US Code 38, §527.)
eligible institution - a school of medicine, osteopathic medicine, dentistry, veterinary medicine, optometry, podiatric medicine, pharmacy, public health, allied health, or chiropractic, or a graduate program in health administration or behavioral and mental health practice, including clinical psychology.	(SOURCE - DHHS, US Code 42, §292o)
eligible investor - (1) United States citizens; (2) corporations, partnerships, or other associations including nonprofit associations, created under the laws of the United States any State or territory thereof, or the District of Columbia, and substantially beneficially owned by United States citizens; and (3) foreign corporations, partnerships, or other associations wholly owned by one or more such United States citizens, corporations, partnerships, or other associations: <i>Provided however</i> , That the eligibility of such foreign corporation shall be determined without regard to any shares, in aggregate less than 5 per centum of the total issued and subscribed share capital, held by other than the United States owners: <i>Provided further</i> , That in the case of any loan investment a final determination of eligibility may be made at the time the insurance or guaranty is issued; in all other cases, the investor must be eligible at the time a claim arises as well as the time the insurance or guaranty is issued.	(SOURCE - DOS/ USAID, FAA OF 1961 (P.L. 87-195), Sec. 238)
eligible investor - (1) United States citizens; (2) corporations, partnerships, or other associations including nonprofit associations, created under the laws of the United States, any State or territory thereof, or the District of Columbia, and substantially beneficially owned by United States citizens; and (3) foreign corporations, partnerships, of other associations wholly owned by one or more such United States citizens, corporations, partnerships, or other associations: <i>Provided, however</i> , That the eligibility of such foreign corporation shall be determined without regard to any shares, in aggregate less than 5 per centum of the total of issued and subscribed share capital, held by other than the United States owners: <i>Provided further</i> , That in the case of any loan investment a final determination of eligibility may be made at the time the insurance or guaranty is issued; in all other cases, the investor must be eligible at the time a claim arises as well as at the time the insurance or guaranty is issued.	(SOURCE - DOS, US Code 22, §2198)
eligible land - (i) Cropland. (ii) Grassland. (iii) Rangeland. (iv) Pasture land. (v) Nonindustrial private forest land. (vi) Other agricultural land (including cropped woodland, marshes, and agricultural land used for the production of livestock) on which resource concerns related to agricultural production could be addressed through a contract under the program, as determined by the Secretary.	(SOURCE - DOI, US Code 16, §3839aa-1)
eligible land - land on which agricultural commodities, livestock, or forest-related products are produced.	(SOURCE - DOI, US Code 16, §3839aa-1)

Terms and Definitions

eligible lender - an eligible institution that became a lender under this subpart prior to September 15, 1992, an agency or instrumentality of a State, a financial or credit institution (including an insurance company) which is subject to examination and supervision by an agency of the United States or of any State, a pension fund approved by the Secretary for this purpose, or a nonprofit private entity designated by the State, regulated by the State, and approved by the Secretary.	(SOURCE - DHHS, US Code 42, §292o)
eligible livestock producer - an eligible producer on a farm that— (I) is an owner, cash or share lessee, or contract grower of covered livestock that provides the pastureland or grazing land, including cash-leased pastureland or grazing land, for the livestock; (II) provides the pastureland or grazing land for covered livestock, including cash-leased pastureland or grazing land that is physically located in a county affected by drought; (III) certifies grazing loss; and (IV) meets all other eligibility requirements established.	(SOURCE - DHS, US Code 19, §2497)
eligible metropolitan area - any of the 100 most populous metropolitan statistical areas in the United States.	(SOURCE - DHS, US Code 6, §601)
eligible migrant - a qualified immigrant who is the spouse or unmarried child of a legalized alien.	(SOURCE - DHS, US Code 8, §1255a.)
eligible migrant and seasonal farmworkers - individuals who are eligible migrant farmworkers or are eligible seasonal farmworkers.	(SOURCE - DOL, US Code 29, §3222)
eligible national association - a national association with demonstrated experience in providing training and technical assistance to protection and advocacy systems.	(SOURCE - DHHS, US Code 42, §300d–53)

In some cases of emotional abuse, the acts of parents or caregivers alone, without any harm evident in the child's behavior or condition, are sufficient to warrant child protective services intervention. For example, practices such as confinement of a child to a dark closet or a cage can be considered emotional abuse.	(SOURCE - DOS/ USAID, FAM, 7 FAM 1723)
emotional disturbance - a condition exhibiting one or more of the following characteristics over a long period of time and to a marked degree that adversely affects a child's educational performance: (A) An inability to learn that cannot be explained by intellectual, sensory, or health factors. (B) An inability to build or maintain satisfactory interpersonal relationships with peers and teachers. (C) Inappropriate types of behavior or feelings under normal circumstances. (D) A general pervasive mood of unhappiness or depression. (E) A tendency to develop physical symptoms or fears associated with personal or school problems.	(SOURCE - ED, CFR 34, §300.8)
emotional neglect - Includes such actions as marked inattention to the child's needs for affection, refusal of or failure to provide needed psychological care, inadequate supervision, spouse abuse in the child's presence, and tolerance of drug or alcohol use by the child. Terms and Definitions

employ - to suffer or permit to work.	(SOURCE - DOL, US Code 29, §152)
employee - A current employee of the Department of State, including members of the Civil Service, Foreign Service, and Locally Employed Staff.	(SOURCE - DOS/ USAID, FAM, 4 FAM 491.3)
employee - a dispatching service employee, a signal employee, or a train employee.	(SOURCE - DOT, US Code 49, §21101.)
employee - a Foreign Service or Civil Service employee of the U.S. Department of State, or a PSC employee, with the exception of overseas local hires, which are addressed in separate nepotism regulations.	(SOURCE - DOS/ USAID, FAM, 3 FAM 8323)
employee - a person employed by, assigned or detailed to, or acting for an element within the Intelligence Community.	(SOURCE - ODNI/ CIA/ DOD, US Code 50, §3001)
employee - an appointed officer or employee of the Department, including a locally employed staff, a special U.S. Government employee, or an expert or consultant.	(SOURCE - DOS/ USAID, FAM, 2 FAM 971.4)
employee - an employee who— (A) has completed at least 3 years of current continuous service with 1 or more covered entities; and (B) is serving under an appointment without time limitation.	(SOURCE - DHS, US Code 6, §292)
employee - An individual employed by DS whose duties require the use of SPE.	(SOURCE - DOS/ USAID, FAM, 12 FAM 041.3)
employee - any employee, and shall not be limited to the employees of a particular employer, unless this subchapter explicitly states otherwise, and shall include any individual whose work has ceased as a consequence of, or in connection with, any current labor dispute or because of any unfair labor practice, and who has not obtained any other regular and substantially equivalent employment, but shall not include any individual employed as an agricultural laborer, or in the domestic service of any family or person at his home, or any individual employed by his parent or spouse, or any individual having the status of an independent contractor, or any individual employed as a supervisor, or any individual employed by an employer subject to the Railway Labor Act, as amended from time to time, or by any other person who is not an employer.	(SOURCE - DOL, US Code 29, §152)
employee - any individual employed by an employer.	(SOURCE - DOL, US Code 29, §1002)
employee - any person employed by an employer. Includes any person who is a citizen, national, or permanent resident alien of the United States employed in a workplace in a foreign country by an employer that is an entity incorporated or otherwise organized in the United States or that is controlled by an entity organized in the United States.	(SOURCE - DVA, US Code 38, §4303.)
employee - any person who receives a salary or compensation of any kind from the United States Government, is a contractor of the United States Government or an employee thereof, is an unpaid consultant of the United States Government, or otherwise acts for or on behalf of the United States Government, except as otherwise determined by the President.	(SOURCE - ODNI/ CIA/ DOD, US Code 50, §3166)
employee - Any U.S. citizen who is a member of the Senior Foreign Service or who is assigned to a salary class in the Foreign Service schedule, and who is serving under either a career or career candidate appointment, or who is serving under a limited appointment that does not confer career candidate status, but does not include consular agents. employee - Assigned personnel (U.S.-based direct hire) of the Federal Government. For categories of	(SOURCE - DOS/ USAID, FAM, 14 FAM 715)

persons authorized or not authorized to use the diplomatic pouch.	
employee - person hired to perform a job usually for wages or salary and normally in a position below the executive level.	(SOURCE - DHS, DHS Lexicon, Terms)
employee - Refers to an individual appointed into the civilian service of a Government agency (including chiefs of mission and members of the Foreign Service of the United States).	(SOURCE - DOS/ USAID, FAH, 4 FAH-3 H-515.1)
employee assistance program - confidential counseling program that offers assessment, short-term counseling, and referral services to employees for a wide range of issues that could interfere with work performance includes, but are not limited to, emotional, family relationship substance abuse, occupational, legal or financial problems.	(SOURCE - DHS, DHS Lexicon, Terms)
employee benefit plan or plan - an employee welfare benefit plan or an employee pension benefit plan or a plan which is both an employee welfare benefit plan and an employee pension benefit plan.	(SOURCE - DOL, US Code 29, §1002)
employee in fire protection activities - an employee, including a firefighter, paramedic, emergency medical technician, rescue worker, ambulance personnel, or hazardous materials worker, who— (1) is trained in fire suppression, has the legal authority and responsibility to engage in fire suppression, and is employed by a fire department of a municipality, county, fire district, or State; and (2) is engaged in the prevention, control, and extinguishment of fires or response to emergency situations where life, property, or the environment is at risk.	(SOURCE - DOL, US Code 29, §152)
employee of the government - (1) officers or employees of any federal agency, members of the military or naval forces of the United States, members of the National Guard while engaged in training or duty under title 32, and persons acting on behalf of a federal agency in an official capacity, temporarily or permanently in the service of the United States, whether with or without compensation, and (2) any officer or employee of a Federal public defender organization, except when such officer or employee performs professional services in the course of providing representation.	(SOURCE - DOJ, US Code 28, §2671)
employee organization - any labor union or any organization of any kind, or any agency or employee representation committee, association, group, or plan, in which employees participate and which exists for the purpose, in whole or in part, of dealing with employers concerning an employee benefit plan, or other matters incidental to employment relationships; or any employees' beneficiary association organized for the purpose in whole or in part, of establishing such a plan.	(SOURCE - DOL, US Code 29, §1002)
employee orientation training - training provided for a general understanding of the organization and its missions.	(SOURCE - DHS, DHS Lexicon, Terms)
employee performance - accomplishment of the work described in the employee's performance plan.	(SOURCE - DHS, DHS Lexicon, Terms)
employee retention - ability of an organization to keep its employees over a period of time is measured by the average length of time an employee stays employed within the same organization over a given period of time.	(SOURCE - DHS, DHS Lexicon, Terms)
employee transition plan - A written plan developed by the HRA for the potential transition of the agency's civilian employees to an MEO, or to private sector or public reimbursable performance. This plan is developed early in the streamlined or standard competition process, based on the incumbent government organization, to identify projected employee impacts and the time needed to accommodate such impacts, depending on the potential outcomes of the competition. The employee transition plan differs from a phase-in plan, which is developed by prospective providers responding to a solicitation.	(SOURCE - White House, OMB, Circular A-76)

Terms and Definitions

employee with a disability - See also special needs. An employee who has a disability as defined in the Rehabilitation Act of 1973 as amended and implementing regulations.	(SOURCE - DOS/ USAID, FAM, 14 FAM 511.3)
employees - Current FS employees, CS employees (including schedule C appointees and annuitants returning to work on temporary appointments on an intermittent basis, commonly referred to as WAE personnel), LE Staff, PSCs, employees assigned to fellowships or details elsewhere and detailees or fellows from other entities assigned to the Department, externs/ interns, SGEs as defined in 18 U.S.C. 202(a), and any other personnel who are employed by State or USAID in the United States or abroad.	(SOURCE - DOS/ USAID, FAM, 3 FAM 4173)
employees who are eligible - TreasuryDirect is provided to U.S. citizen employees and personal services contractors payrolled through American Payroll (CGFS/ C/ APP). The LE staff payroll system does not handle deductions for TreasuryDirect.	(SOURCE - DOS/ USAID, FAH, 4 FAH-3 H-548.2-2)
employer - any business enterprise that employs— (A) 100 or more employees, excluding part-time employees; or (B) 100 or more employees who in the aggregate work at least 4,000 hours per week (exclusive of hours of overtime).	(SOURCE - DOL, US Code 29, §2101)
employer - any person acting as an agent of an employer, directly or indirectly, but shall not include the United States or any wholly owned Government corporation, or any Federal Reserve Bank, or any State or political subdivision thereof, or any person subject to the Railway Labor Act, as amended from time to time, or any labor organization (other than when acting as an employer), or anyone acting in the capacity of officer or agent of such labor organization.	(SOURCE - DOL, US Code 29, §152)
employer - any person acting directly as an employer, or indirectly in the interest of an employer, in relation to an employee benefit plan; and includes a group or association of employers acting for an employer in such capacity.	(SOURCE - DOL, US Code 29, §1002)
Employer Identification Number - A taxpayer identification number obtained by sole proprietors, businesses, and U.S. agencies to identify themselves when reporting wage and/ or salary payments made as employers to other contracted parties. Also called EIN.	(SOURCE - DOS/ USAID, FAH, 4 FAH-3 H-415.3)
employing bureau - The bureau in which the DETO is employed.	(SOURCE - DOS/ USAID, FAM, 3 FAM 2368.2)
employment — The strategic, operational, or tactical use of forces.	(SOURCE - DOD, DOD Dictionary, JP 5-0)
employment benefits - all benefits provided or made available to employees by an employer, including group life insurance, health insurance, disability insurance, sick leave.	(SOURCE - DOL, US Code 29, §2611.)
employment fitness adjudication - process of evaluation of pertinent data in a background investigation, as well as any other available information that is relevant and reliable, for employment is used to determine whether an individual is: (i) suitable for Government employment; (ii) eligible for logical and physical access; (iii) eligible for access to classified information; (iv) eligible to hold a sensitive position; or (v) fit to perform work for or on behalf of the Government as a contractor employee.	(SOURCE - DHS, DHS Lexicon, Terms)
employment handicap - an impairment, resulting in substantial part from a disability, of a veteran's ability to prepare for, obtain, or retain employment consistent with such veteran's abilities, aptitudes, and interests.	(SOURCE - DVA, US Code 38, §3101.)
employment loss - (A) an employment termination, other than a discharge for cause, voluntary departure, or retirement, (B) a layoff exceeding 6 months, or (C) a reduction in hours of work of more than 50 percent during each month of any 6-month period.	(SOURCE - DOL, US Code 29, §2101)

employment outcome - A) entering or retaining full-time or, if appropriate, part-time competitive employment in the integrated labor market; (B) satisfying the vocational outcome of supported employment; or (C) satisfying any other vocational outcome the Secretary of Education may determine to be appropriate (including satisfying the vocational outcome of customized employment, self-employment, telecommuting, or business ownership), in a manner consistent with this chapter.	(SOURCE - DOL, US Code 29, §705)
employment position - set of duties and responsibilities which make up the work performed by an employee.	(SOURCE - DHS, DHS Lexicon, Terms)
en route care — Continuation of the provision of care during movement (evacuation) between the health service support capabilities in the roles of care, without clinically compromising the patient's condition. See also evacuation.	(SOURCE - DOD, DOD Dictionary, JP 4-02)
enabling clause - the Decision on Differential and More Favourable Treatment, Reciprocity and Fuller Participation of Developing Countries (L/ 4903), adopted November 28, 1979, under GATT 1947.	(SOURCE - DHS, US Code 19, §4210)
encrypted for transmission only - classification used in Sensitive-But-Unclassified No Foreign (SBU NOFORN) telegrams.	(SOURCE - DOS/ USAID, FAH, 5 FAH-1 H-114)
encrypted text - Data encoded into an unclassified form using a nationally accepted form of encoding.	(SOURCE - DOS/ USAID, FAM, 12 FAM 091)
encryption - Conversion of plaintext to ciphertext through the use of a cryptographic algorithm.	(SOURCE - DOS/ USAID, FAM, 12 FAM 091)
encryption research - activities necessary to identify and analyze flaws and vulnerabilities of encryption technologies applied to copyrighted works, if these activities are conducted to advance the state of knowledge in the field of encryption technology or to assist in the development of encryption products.	(SOURCE - DOC, US Code 17, §1201.)
encryption technology - the scrambling and descrambling of information using mathematical formulas or algorithms.	(SOURCE - DOC, US Code 17, §1201.)
end date - The end date for a streamlined or standard competition is the date that all SCF certifications are completed, signifying an agency's performance decision.	(SOURCE - White House, OMB, Circular A-76)
end evening civil twilight — The point in time when the sun has dropped 6 degrees beneath the western horizon, and is the instant at which there is no longer sufficient light to see objects with the unaided eye. Also called EECT.	(SOURCE - DOD, DOD Dictionary, JP 2-01.3)
end item — A final combination of end products, component parts, and/ or materials that is ready for its intended use.	(SOURCE - DOD, DOD Dictionary, JP 4-02)
end item - the final production product when assembled or completed, and ready for issue, delivery, or deployment.	(SOURCE - DOD, US Code 10, §2533b)
end of evening nautical twilight — The point in time when the sun has dropped 12 degrees below the western horizon, and is the instant of last available daylight for the visual control of limited military operations. Also called EENT.	(SOURCE - DOD, DOD Dictionary, JP 2-01.3)
end of the war - the date of proclamation of exchange of ratifications of the treaty of peace, unless the President shall, by proclamation, declare a prior date, in which case the date so proclaimed shall be deemed to be the end of the war.	(SOURCE - ODNI/ CIA/ DOD, US Code 50, §4302)

Terms and Definitions

end product - supplies delivered under a line item of a Government contract.	(SOURCE - GSA/ DOD, FAR, VOL I CH A)
end state — The set of required conditions that defines achievement of the commander's objectives.	(SOURCE - DOD, DOD Dictionary, JP 3-0)
end user - person that uses the solution developed by the project in the operational field.	(SOURCE - DHS, DHS Lexicon, Terms)
endemic - The constant presence and/ or usual presence of a disease or condition found in a population within a geographic area. This may also be thought of as the baseline.	(SOURCE - USAID, FOG, CHIII)
end-of-message indicator - The #, station serial number, two carriage returns, eight line feeds, and four Ns (NNNN) appearing at the end of a telegraphic transmission indicating the end of the transmission. Also called EOM.	(SOURCE - DOS/ USAID, FAH, 5 FAH-2 H-114)
endorsed cryptographic products list - Contains products that provide electronic cryptographic coding (encrypting) and decoding (decrypting), and have been endorsed for use on classified or Sensitive But Unclassified (SBU) U.S. Government or Government-derived information during its transmission.	(SOURCE - DOS/ USAID, FAM, 12 FAM 091)
endorsing or espousing terrorism - An alien is inadmissible under INA if the alien endorses or espouses terrorist activity or persuades others to endorse or support terrorist activity or a terrorist organization. A safe house; Transportation; Communications; Funds; Transfer of funds or other material financial benefit; False documentation or identification; Weapons including chemical, biological, or radiological weapons; Explosives; or Training. endowment fund - a fund, or a tax-exempt foundation, established and maintained by the Helen Keller National Center for the purpose of generating income for the support of the Center.	(SOURCE - DOL, US Code 29, §1907)
endowment fund corpus - an amount equal to the Federal payments made to the Endowment Fund and amounts contributed to the Endowment Fund from non-Federal sources.	(SOURCE - DOL, US Code 29, §1907)
endowment fund income - an amount equal to the total market value of the Endowment Fund minus the Endowment Fund corpus.	(SOURCE - DOL, US Code 29, §1907)
endpoint - Video conferencing specific equipment used to connect to an enterprise network for the purpose of participating in a video conference.	(SOURCE - DOS/ USAID, FAM, 5 FAM 593)
end-to-end — A term that describes joint distribution operations boundaries, which begin at the point of origin and terminate at the geographic combatant commander's designated point of need within a desired operational area, including the return of forces and materiel.	(SOURCE - DOD, DOD Dictionary, JP 4-09)
Enduring Constitutional Government - A cooperative effort among the executive, legislative, and judicial branches of the Federal Government, coordinated by the President, as a matter of comity with respect to the legislative and judicial branches and with proper respect for the constitutional separation of powers among the branches, to preserve the constitutional framework under which the nation is governed and the capability of all three branches of government to execute constitutional responsibilities and provide for orderly succession, appropriate transition of leadership, and interoperability and support of NEFs during a catastrophic emergency. Also called ECG.	(SOURCE - DOS/ USAID, FAM, 6 FAM 414)
enemy - any country, government, group, or person that has been engaged in hostilities, whether or not lawfully authorized, with the United States.	(SOURCE - ODNI/ CIA/ DOD, US Code 50, §2204)
enemy combatant — In general, a person engaged in hostilities against the United States or its coalition	(SOURCE - DOD,

partners during an armed conflict. Also called EC.	DOD Dictionary, DODD 2310.01E)
energy - all forms of energy including petroleum, gas (both natural and manufactured), electricity, solid fuels (including all forms of coal, coke, coal chemicals, coal liquification, and coal gasification), solar, wind, other types of renewable energy, atomic energy, and the production, conservation, use, control, and distribution (including pipelines) of all of these forms of energy.	(SOURCE - ODNI/ CIA/ DOD, US Code 50, §4552)
energy action - any matter required to be transmitted, or submitted to the Congress.	(SOURCE - DHHS/ HUD/ EPA/ FEMA, US Code 42, §6421)
energy audit - a determination of the energy consumption characteristics of a building which— (A) identifies the type, size, and rate of energy consumption of such building and the major energy using systems of such building; (B) determines appropriate energy conservation maintenance and operating procedures; and (C) indicates the need, if any, for the acquisition and installation of energy conservation measures.	(SOURCE - DHHS/ HUD/ EPA/ FEMA, US Code 42, §6371)
energy audit - any process which identifies and specifies the energy and cost savings which are likely to be realized through the purchase and installation of particular energy conservation measures or renewable-resource energy measures and which— (A) is carried out in accordance with rules of the Secretary; and (B) imposes— (i) no direct costs, with respect to individuals who are occupants of dwelling units in any State having and (ii) only reasonable costs, as determined by the Secretary, with respect to any person not described in clause (i). Rules referred to in subparagraph (A) may include minimum qualifications for, and provisions with respect to conflicts of interest of, persons carrying out such energy audits.	(SOURCE - DHHS/ HUD/ EPA/ FEMA, US Code 42, §6326)
energy commodity — (A) petroleum products;(B) natural gas;(C) coal; (D) wind and solar energy components; and (E) biofuels.	(SOURCE - DHS, US Code 33, §2238c)
energy conservation maintenance and operating procedure - modification or modifications in the maintenance and operations of a building, and any installations therein, which are designed to reduce energy consumption in such building and which require no significant expenditure of funds.	(SOURCE - DHHS/ HUD/ EPA/ FEMA, US Code 42, §6371)
energy conservation measure - a measure which modifies any building, building system, energy consuming device associated with the building, or industrial plant, the construction of which has been completed prior to May 1, 1989, if such measure has been determined by means of an energy audit or by the Secretary, to be likely to maintain or improve the efficiency of energy use and to reduce energy costs (as calculated on the basis of energy costs reasonably projected over time, as determined by the Secretary) in an amount sufficient to enable a person to recover the total cost of purchasing and installing such measure (without regard to any tax benefit or Federal financial assistance applicable thereto) within the period of— (A) the useful life of the modification involved, as determined by the Secretary, or (B) 15 years after the purchase and installation of such measure, whichever is less. Such term does not include (i) the purchase or installation of any appliance, (ii) any conversion from one fuel or source of energy to another which is of a type which the Secretary, by rule, determines is ineligible on the basis that such type of conversion is inconsistent with national policy with respect to energy conservation or reduction of imports of fuels, or (iii) any measure, or type of measure, which the Secretary determines does not have as its primary purpose an improvement in efficiency of energy use.	(SOURCE - DHHS/ HUD/ EPA/ FEMA, US Code 42, §6326)
energy conservation measure - an installation or modification of an installation in a building which is primarily intended to maintain or reduce energy consumption and reduce energy costs or allow the use of an alternative energy source, including, but not limited to— (A) insulation of the building structure and systems within the building; (B) storm windows and doors, multiglazed windows and doors, heat absorbing or heat reflective glazed and coated windows and door systems, additional glazing, reductions in glass area, and other window and door system modifications; (C) automatic	(SOURCE - DHHS/ HUD/ EPA/ FEMA, US Code 42, §6371)

energy control systems and load management systems; (D) equipment required to operate variable steam, hydraulic, and ventilating systems adjusted by automatic energy control systems; (E) solar space heating or cooling systems, solar electric generating systems, or any combination thereof; (F) solar water heating systems; (G) furnace or utility plant and distribution system modifications including— (i) replacement burners, furnaces, boilers, or any combination thereof, which substantially increases the energy efficiency of the heating system, (ii) devices for modifying flue openings which will increase the energy efficiency of the heating system, (iii) electrical or mechanical furnace ignition systems which replace standing gas pilot lights, and (iv) utility plant system conversion measures including conversion of existing oil- and gas-fired boiler installations to alternative energy sources, including coal; (H) caulking and weather-stripping; (I) replacement or modification of lighting fixtures which replacement or modification increases the energy efficiency of the lighting system without increasing the overall illumination of a facility (unless such increase in illumination is necessary to conform to any applicable State or local building code or, if no such code applies, the increase is considered appropriate by the Secretary); (J) energy recovery systems; (K) cogeneration systems which produce steam or forms of energy such as heat, as well as electricity for use primarily within a building or a complex of buildings owned by a school or hospital and which meet such fuel efficiency requirements as the Secretary may by rule prescribe; (L) such other measures as the Secretary identifies by rule for purposes of this part; and (M) such other measures as a grant applicant shows will save a substantial amount of energy and as are identified in an energy audit prescribed.

energy conservation measures - measures that are applied to a Federal building that improve energy efficiency and are life cycle cost effective and that involve energy conservation, cogeneration facilities, renewable energy sources, improvements in operations and maintenance efficiencies, or retrofit activities.	(SOURCE - DOE, US Code 42, §8259.)
energy conservation project - (A) an undertaking to acquire and to install one or more energy conservation measures in school or hospital facilities and (B) technical assistance in connection with any such undertaking and technical assistance.	(SOURCE - DHHS/ HUD/ EPA/ FEMA, US Code 42, §6371)
energy conservation project costs - only costs incurred in the design, acquisition, construction, and installation of energy conservation measures and technical assistance costs.	(SOURCE - DHHS/ HUD/ EPA/ FEMA, US Code 42, §6371)
energy efficiency - measures, practices, or programs that reduce the energy used by specific devices and systems, typically without adversely affecting the services provided.	(SOURCE - DHS, DHS Lexicon, Terms)
energy efficiency product - product in the upper 25 percent of efficiency for all similar products or, if there are applicable federal appliance or equipment efficiency standards, a product that is at least 10-percent more efficient than the minimum federal standard.	(SOURCE - DHS, DHS Lexicon, Terms)
energy efficiency project - the installation or upgrading of equipment that results in a significant reduction in energy usage.	(SOURCE - DOC, US Code 15, §636.)
energy efficient features or equipment - features of, or equipment in, a primary residence that help reduce the amount of electricity used to heat, cool, or ventilate such residence, including insulation, weather-stripping, air sealing, heating system repairs, duct sealing, or other measures.	(SOURCE - DVA, US Code 38, §2023.)
energy efficient product [electronic] - electronic product that is engineered to use significantly less energy than that generally required by federal standards includes ENERGY STAR, Federal Energy Management Program (FEMP) designed, and low-standby power devices.	(SOURCE - DHS, DHS Lexicon, Terms)
energy intensity - measure of the energy efficiency of a nation's economy and is calculated as units of energy per unit of gross domestic product (GDP).	(SOURCE - DHS, DHS Lexicon, Terms)

energy product equivalent - an energy carrier including, but not limited to, ammonia, hydrogen, or molten salts or an energy-intensive commodity, including, but not limited to, electrometals, fresh water, or nutrients for aquaculture.	(SOURCE - DOE, US Code 42, §9008.)
energy project - a project that provides for the generation or transmission of electrical energy.	(SOURCE - DOT, US Code 49, §44718.)
energy savings performance contract - contract (such as a task ordered by a Component and awarded to an energy service company) that provides for the performance of services for the design, acquisition, financing, installation, testing, operation, and maintenance and repair of an identified energy, renewable energy, or water conservation measure or series of measures at one or more locations.	(SOURCE - DHS, DHS Lexicon, Terms)
Energy Savings Performance Contracts - partnerships between the U.S. Government and an Energy Services Company (ESCO), which audits, designs, and constructs a project to reduce energy costs and makes all arrangements to fund the project. The ESCO is reimbursed from the energy cost savings over a payback period of up to 25 years. ESPCs are a funding strategy endorsed by the U.S. Government through legislation in 1992. There is no mandate to use ESPCs, and the Government Accountability Office (GAO) considers them less cost effective than projects executed with appropriated funds. ESPCs are intended to help agencies achieve the goals of Energy Independence and Security Act of 2007, and subsequent Executive Orders. Also called ESPC.	(SOURCE - DOS/ USAID, FAM, 15 FAM 624.1)
energy security - having assured access to reliable supplies of energy and the ability to protect and deliver sufficient energy to meet mission essential requirements. (B) In selecting facility energy projects that will use renewable energy sources, pursuit of energy security means the installation will give favorable consideration to projects that provide power directly to a military facility or into the installation electrical distribution network. In such cases, projects should be prioritized to provide power for assets critical to mission essential requirements on the installation in the event of a disruption in the commercial grid. Energy Star® certified - indication for a product carrying the ENERGY STAR logo indicating that it meets international standards set by Environmental Protection Agency (EPA) as an energy efficient product.	(SOURCE - DHS, DHS Lexicon, Terms)
Energy Star® logo - logo indicating that a product to which it applies meets international standards set by the Environmental Protection Agency (EPA) as an energy efficient product.	(SOURCE - DHS, DHS Lexicon, Terms)
Energy Star® program - joint program of the U.S. EPA and U.S. DOE to identify and promote energy-efficient products and buildings in order to reduce energy consumption, improve energy security, and reduce pollution through voluntary labeling of or other forms of communication about products and buildings that meet the highest energy efficiency standards.	(SOURCE - DHS, DHS Lexicon, Terms)
energy survey - a procedure used to determine energy and cost savings likely to result from the use of appropriate energy related maintenance and operating procedures and modifications, including the purchase and installation of particular energy-related equipment and the use of renewable energy sources.	(SOURCE - DOE, US Code 42, §8259.)
energy sustainability - using a renewable energy source, thermal energy source, or a highly efficient technology for transportation, electricity generation, heating, cooling, lighting, or other energy services in fixed installations.	(SOURCE - DHHS/ HUD/ EPA/ FEMA, US Code 42, §6371h-1)
energy system - a facility designed to utilize energy released in the magnetic fusion process for the generation of electricity and the production of hydrogen or other fuels.	(SOURCE - DOE, US Code 42, §9302.)
energy use intensity - energy consumption per gross square foot of building space includes industrial and	(SOURCE - DHS, DHS Lexicon,

energy-efficient maintenance —(A) the repair of military vehicles, equipment, or facility and infrastructure systems, such as lighting, heating, or cooling equipment or systems, or industrial processes, by replacement with technology that— (i) will achieve energy savings over the life-cycle of the equipment or system being repaired; and (ii) will meet the same end needs as the equipment or system being repaired; and (B) improvements in an operation or maintenance process, such as improved training or improved controls, that result in energy savings.	(SOURCE - DOD, US Code 10, §2924)
energy-efficient product — (1) a product that— (i) Meets Department of Energy and Environmental Protection Agency criteria for use of the Energy Star trademark label; or (ii) Is in the upper 25 percent of efficiency for all similar products as designated by the Department of Energy's Federal Energy Management Program. (2) As used in this definition, the term "product" does not include any energy-consuming product or system designed or procured for combat or combat-related missions.	(SOURCE - GSA/ DOD, FAR, VOL I CH A)
energy-efficient standby power devices - products that use— (1) External standby power devices, or that contain an internal standby power function; and (2) No more than one watt of electricity in their standby power consuming mode or meet recommended low standby levels as designated by the Department of Energy Federal Energy Management Program.	(SOURCE - GSA/ DOD, FAR, VOL I CH A)
energy-savings performance contract - a contract that requires the contractor to— (1) Perform services for the design, acquisition, financing, installation, testing, operation, and where appropriate, maintenance and repair, of an identified energy conservation measure or series of measures at one or more locations; (2) Incur the costs of implementing the energy savings measures, including at least the cost (if any) incurred in making energy audits, acquiring and installing equipment, and training personnel in exchange for a predetermined share of the value of the energy savings directly resulting from implementation of such measures during the term of the contract; and (3) Guarantee future energy and cost savings to the Government. exempt employee [essential personnel] (*) - employee in a category of essential personnel in positions that are performing functions or activities that are exempt from work restrictions during a lapse in government appropriations the following activities and/ or functions (and the contracts that support them) may continue during a lapse of appropriations: a. Funded by other than annual appropriated funds. Some functions are covered by multi-year, no-year, or revolving funds, or advance appropriation, and if those accounts have sufficient carryover balance, they would not be affected by an annual appropriation lapse. Revolving funds that operate almost entirely on offsetting collections from other Federal entities may also be forced to close, unless sufficient retained earnings are available to forestall the closure. b. Expressly Authorized to Continue Even Without Funding. Congress provides express authority for some agencies to enter into contracts or to borrow funds to accomplish some of their functions despite an appropriations lapse. c. Necessary for Safety of Human Life or Protection of Property. In order to qualify under the exception for safety of life or protection of property a reasonable, articulable connection must exist between the function to be performed and the safety of human life or protection of property. There must be some reasonable likelihood that the safety of human life or protection of property would be threatened in some significant degree by the delay in the performance of the function in question. Specifically, the risk should be real, not hypothetical or speculative, and must be sufficiently imminent that delay is not permissible. d. Any activity and/ or function that continues based on a determination that it qualifies for the safety of life or protection of property exception must be limited only to the extent that the Component Head determines that imminent danger to life or property would result from their termination or diminution. As for any administrative, research, or support function related to an exempt activity, that function should also continue, but only to the extent that it is essential to maintain the effectiveness of those activities and/ or functions that are engaged for the safety of life or the protection of property. In particular, administrative, research, and other overhead activities supporting exempt activities should be carefully reviewed to make certain their continuance is	(SOURCE - DHS, DHS Lexicon, Terms)

essential to carrying out the exempt activities. In addition, there must be some reasonable likelihood that the safety of human life or protection of property would be compromised in some significant degree if there were any delay in the performance of the administrative, research, overhead, or support activity that is in question. e. Necessary for the Orderly Closure of Functions. Agencies may obligate funds during periods of lapsed appropriations to bring about the orderly shutdown of non-exempt activities. Contingency plans which call for winding down operations of an agency after an appropriations lapse will comply with the Anti-Deficiency Act. The Office of Management and Budget has determined that the normal winding down of operations should take no more than four hours. During the winding down time, the activities of employees during this period must be wholly devoted to closing down the function and upon completion, these employees would be released.

furniture, furnishings, and equipment - Those items placed in offices and residences of U.S. Government employees. Also called FF&E.	(SOURCE - DOS/ USAID, FAM, 15 FAM 12)
fuse and analyze - ability to establish key characteristics of, to externally collect data, and internally analyze data, information, and intelligence about, hazards, threats, people, cargo, conveyances, and infrastructure within a domain to obtain situational awareness and inform operators and decision-makers about all pertinent aspects of an event or situation.	(SOURCE - DHS, DHS Lexicon, Terms)
fusion - a process whereby two light nuclei, such as deuterium and tritium, collide at high velocity, forming a compound nucleus, which subsequently separates into constituents which are different from the original colliding nuclei, and which carry away the accompanying energy release.	(SOURCE - DOE, US Code 42, §9302.)
fusion - In intelligence usage, the process of managing information to conduct all-source analysis and derive a complete assessment of activity.	(SOURCE - DOD, DOD Dictionary, JP 2-0)
fusion center - a collaborative effort of 2 or more Federal, State, local, or tribal government agencies that combines resources, expertise, or information with the goal of maximizing the ability of such agencies to detect, prevent, investigate, apprehend, and respond to criminal or terrorist activity.	(SOURCE - DHS, US Code 6, §124h.)
Fusion Center - Facility that brings together into one central location law enforcement, intelligence, emergency management, public health, and other agencies, as well as private-sector and nongovernmental organizations when appropriate, and that has the capabilities to evaluate and act appropriately on all available information.	(SOURCE - DHS/ FEMA, NRF, Glossary)
fusion center - physical or logical facility, encompassing all necessary infrastructure required to facilitate nationwide information-sharing between one or more federal, state, and/ or local law enforcement entities, dedicated to the integration of multiple diverse data sources within a defined functional domain collaborative effort of two or more agencies or program offices who provide resources, expertise, and/ or information to the center with the goal of maximizing the ability to detect, prevent, apprehend, and respond to criminal and terrorism related activity by applying the concepts of fusion, and to provide a means of intelligence dissemination.	(SOURCE - DHS, DHS Lexicon, Terms)
fusion center performance program - program to measure the capability and performance of the National Network of Fusion Centers over time through the collection of standardized data provides an objective basis to demonstrate the value of fusion centers in supporting national information sharing and homeland security outcomes, and encourages continued coordination among interagency partners to effectively and efficiently support fusion centers.	(SOURCE - DHS, DHS Lexicon, Terms)
fusion engineering device - a magnetic fusion facility which achieves at least a burning plasma and serves to test components for engineering purposes.	(SOURCE - DOE, US Code 42, §9302.)
fusion liaison officer - person who serves as the conduit for the flow of homeland security and crime-related information between the field and the fusion center for assessment and analysis.	(SOURCE - DHS, DHS Lexicon, Terms)
fusion process - overarching process of managing the flow of information and intelligence across levels and sectors of government and private industry, which supports the implementation of risk-based, information-driven prevention, response, and consequence management programs.	(SOURCE - DHS, DHS Lexicon, Terms)
future indicator - These performance measures are identified for use in the future years of this plan in cases where a Departmental objective represents a long-term, macro-level outcome that is difficult to measure over a longer period of time. The Department aspires to use these more-ideal indicators by 2018 and will develop appropriate measurement methodologies.	(SOURCE - DOC, Strategic Plan 2014, Terms)

future procurement monopoly risk - risk associated with choosing an investment that depends on other technologies or applications that require future procurements to be from a particular vendor or supplier.	(SOURCE - DHS, DHS Lexicon, Terms)
Future Years Homeland Security Program - official DHS Program of Record (POR) summarizing DHS programs and associated resources (investments, construction, human capital, information technology, and other support and operating expenses) for the budget year plus four years in support of strategic goals, objectives, and planning priorities and reflects the Administration's position on the DHS top-line and the allocation of DHS resources across Component programs and DHS missions. tactical artillery mission. Also called GS. See also direct support; general support-reinforcing.	
	JP 3-09.3)
general support system - An interconnected information resource under the same direct management control that shares common functionality. It normally includes hardware, software, information, data, applications, communications, facilities, and people, and provides support for a variety of users and/ or applications. Individual applications support different mission-related functions. Users may be from the same or different organizations.	(SOURCE - DOS/ USAID, FAH, 5 FAH 11)
general support system - Interconnected information resources under the same direct management control that shares common functionality. A GSS normally includes hardware, software, information, data, applications, communications, facilities, and people and provides support for a variety of users and/ or applications. Also called GSS.	(SOURCE - DOS/ USAID, FAM, 12 FAM 091)
general support-reinforcing - The artillery mission of supporting the force as a whole and of providing reinforcing fires for other artillery units. Also called GSR.	(SOURCE - DOD, DOD Dictionary, JP 3-09.3)
general training - level of training designed to provide the knowledge or skill sets which are common to many assignments, positions, and/ or occupations.	(SOURCE - DHS, DHS Lexicon, Terms)
general unloading period - In amphibious operations, that part of the ship-to-shore movement in which unloading is primarily logistic in character, and emphasizes speed and volume of unloading operations. See also initial unloading period.	(SOURCE - DOD, DOD Dictionary, JP 3-02)
generally accepted accounting principles - (A) the recognized consensus or substantial authoritative support given in the territory of Colombia or the United States, as the case may be, with respect to the recording of revenues, expenses, costs, assets, and liabilities, the disclosure of information, and the preparation of financial statements; and (B) may encompass broad guidelines for general application as well as detailed standards, practices, and procedures.	(SOURCE - DHS, US Code 19, §3805.)
generally accepted accounting principles - Has the meaning specified in generally accepted auditing standards issued by the American Institute of Certified Public Accountants (AICPA).	(SOURCE - DOS/ USAID, FAH, 4 FAH-3 H-612.3)
generally accepted accounting principles - the recognized consensus or substantial authoritative support in the territory of a CAFTA–DR country with respect to the recording of revenues, expenses, costs, assets, and liabilities, the disclosure of information, and the preparation of financial statements. The principles may encompass broad guidelines of general application as well as detailed standards, practices, and procedures.	(SOURCE - DHS, US Code 19, §4033)
generally accepted accounting principles - the recognized consensus or substantial authoritative support in the territory of a NAFTA country with respect to the recording of revenues, expenses, costs, assets and liabilities, disclosure of information, and preparation of financial statements. These standards may be broad guidelines of general application as well as detailed standards, practices, or procedures.	(SOURCE - DHS, US Code 19, §3332.)
generally accepted government auditing standards - issued by the Comptroller General of the United States, which are applicable to financial audits. Also called GAGAS.	(SOURCE - White House, OMB, Circular A-133, Section .105)
generally accepted government auditing standards - standards issued by the Comptroller General of the United States, which are applicable to financial audits. Also called GAGAS.	(SOURCE - DOS/ USAID, FAH, 4 FAH-3 H-612.3)
genetic information - (i) such individual's genetic tests, (ii) the genetic tests of family members of such	(SOURCE - DOL, US Code 29,

individual, and (iii) the manifestation of a disease or disorder in family members of such individual.	§1191b)
genetic information - (i) such individual's genetic tests,(ii) the genetic tests of family members of such individual, and(iii) the manifestation of a disease or disorder in family members of such individual.	(SOURCE - DHHS, US Code 42, §300gg-91)
genetic services – (A) a genetic test; (B) genetic counseling (including obtaining, interpreting, or assessing genetic information); or (C) genetic education.	(SOURCE - DOL, US Code 29, §1191b)
genetic services - A) a genetic test;(B) genetic counseling (including obtaining, interpreting, or assessing genetic information); or(C) genetic education.	(SOURCE - DHHS, US Code 42, §300gg-91)
genetic test - an analysis of human DNA, RNA, chromosomes, proteins, or metabolites, that detects genotypes, mutations, or chromosomal changes.	(SOURCE - DOL, US Code 29, §1191b)
genetic test - an analysis of human DNA, RNA, chromosomes, proteins, or metabolites, that detects genotypes, mutations, or chromosomal changes.	(SOURCE - DHHS, US Code 42, §300gg-91)
Geneva Conventions - (i) the Convention for the Amelioration of the Condition of the Wounded and Sick in Armed Forces in the Field, done at Geneva August 12, 1949; (ii) the Convention for the Amelioration of the Condition of the Wounded, Sick, and Shipwrecked Members of the Armed Forces at Sea, done at Geneva August 12, 1949; (iii) the Convention Relative to the Treatment of Prisoners of War, done at Geneva August 12, 1949; and (iv) the Convention Relative to the Protection of Civilian Persons in Time of War, done at Geneva August 12, 1949. (SOURCE - DOS/ USAID, FAM, 9 FAM 102.3-1 (U))
geochemical surveys - surveys on the ground for mineral deposits by the proper application of the principles and techniques of the science of chemistry as they relate to the search for and discovery of mineral deposits.	(SOURCE - DOI, US Code 30, §28-2)
geodetic control - provides a common reference system for establishing coordinates for all geographic data. All NSDI framework data and users' applications data require geodetic control to accurately register spatial data. The National Spatial Reference System is the fundamental geodetic control for the United States.	(SOURCE - White House, OMB, Circular No. A-16 Revised)
geofluid - any fluid used to extract thermal energy from the Earth which is transported to the surface for direct use or electric power generation, except that such term shall not include oil or natural gas.	(SOURCE - DOD/ DOJ, US Code 42, §17191)
geographic area within a State - a special purpose district or other region recognized for governmental purposes within such State which is not a unit of local government.	(SOURCE - USDA, US Code 7, §228.)
geographic combatant commander - A U.S. military area commander. Also called GCC.	(SOURCE - DOS/ USAID, FAM, 2 FAM 111.2)
geographic coordinates - The quantities of latitude and longitude which define the position of a point on	(SOURCE - DOD,

Terms and Definitions

the surface of the Earth with respect to the reference spheroid.	DOD Dictionary, JP 2-03)
geographic information - Coordinate and attribute data for location-based features, usually in the categories of point (e.g., a well), line (e.g., a road), polygon (e.g., a forest), cell (e.g., a raster-based rectangle), or coordinates (e.g., the latitude-longitude of a point on the ground).	(SOURCE - White House, OMB, Circular No. A-16 Revised)
geographic Information system - A computer system for the input, editing, storage, retrieval, analysis, synthesis, and output of location-based information. GIS may refer to hardware and software, or include data.	(SOURCE - White House, OMB, Circular No. A-16 Revised)
geologic - all geologic mapping information and related geoscience spatial data (including associated geophysical, geochemical, geochronologic, and paleontologic data) that can contribute to the National Geologic Map Database.	(SOURCE - White House, OMB, Circular No. A-16 Revised)
geological surveys - surveys on the ground for mineral deposits by the proper application of the principles and techniques of the science of geology as they relate to the search for and discovery of mineral deposits.	(SOURCE - DOI, US Code 30, §28–2)
geomagnetic storm - a temporary disturbance of the Earth's magnetic field resulting from solar activity.	(SOURCE - DOI, US Code 16, §824o–1)
geophysical surveys - surveys on the ground for mineral deposits through the employment of generally recognized equipment and methods for measuring physical differences between rock types or discontinuities in geological formations.	(SOURCE - DOI, US Code 30, §28–2)
geopressed resources - geothermal deposits found in sedimentary rocks under higher than normal pressure and saturated with gas or methane.	(SOURCE - DOD/DOI, US Code 42, §17191)
georeference - A set of datums by which the location of each point can be uniquely identified.	(SOURCE - White House, OMB, Circular No. A-16 Revised)
geospatial data - Information that identifies the geographic location and characteristics of natural or constructed features and boundaries on the Earth. This information may be derived from, among other things, remote sensing, mapping, and surveying technologies. Statistical data may be included in this definition at the discretion of the collecting agency.	(SOURCE - White House, OMB, Circular No. A-16 Revised)
geospatial engineering - Those engineering capabilities and activities that contribute to a clear understanding of the physical environment by providing geospatial information and services to commanders and staffs. See also geospatial information and services.	(SOURCE - DOD, DOD Dictionary, JP 3-34)
geospatial information - graphical or digital data depicting natural or manmade physical features, phenomena, or boundaries of the earth and any information related thereto, including surveys, maps, charts, remote sensing data, and images.	(SOURCE - DHS, US Code 6, §343.)
geospatial information - graphical or digital data depicting natural or manmade physical features, phenomena, or boundaries of the earth and any information related thereto includes surveys, maps, charts, remote sensing data, and images.	(SOURCE - DHS, DHS Lexicon, Terms)
geospatial information - Information that identifies the geographic location and characteristics of natural or constructed features and boundaries on the Earth, including: statistical data and information derived from, among other things, remote sensing, mapping, and surveying technologies; and mapping, charting, geodetic data and related products.	(SOURCE - DOD, DOD Dictionary, JP 2-03)
geospatial information - knowledge of the nature and distribution of physical and cultural features on	(SOURCE -

the landscape based on analysis of data from airborne or spaceborne platforms or other types and sources of data.	SPACE, US Code 51, §60301)
geospatial information and services - The collection, information extraction, storage, dissemination, and exploitation of geodetic, geomagnetic, imagery, gravimetric, aeronautical, topographic, hydrographic, littoral, cultural, and toponymic data accurately referenced to a precise location on the Earth's surface. Also called GI&S.	(SOURCE - DOD, DOD Dictionary, JP 2-03)
geospatial intelligence - The exploitation and analysis of imagery and geospatial information to describe, assess, and visually depict physical features and geographically referenced activities on the Earth. Geospatial intelligence consists of imagery, imagery intelligence, and geospatial information. Also called GEOINT.	(SOURCE - DOD, DOD Dictionary, JP 2-03)
geospatial intelligence operations - The tasks, activities, and events to collect, manage, analyze, generate, visualize, and provide imagery, imagery intelligence, and geospatial information necessary to support national and defense missions and international arrangements. Also called GEOINT operations.	(SOURCE - DOD, DOD Dictionary, JP 2-03)
geospatial metadata - information that documents geographic digital data such as GIS files, geospatial databases, and earth imagery but can also be used to document geospatial resources including data catalogs, mapping applications, data models and related websites includes core library catalog elements such as title, abstract, and publication data; geographic elements such as geographic extent and projection information; and database elements such as attribute label definitions and attribute domain values.	(SOURCE - DHS, DHS Lexicon, Terms)

Included in this definition are contractor employees required or authorized to operate U.S. Government vehicles under the terms of an existing contract with the Department of State.	(SOURCE - DOS/ USAID, FAM, 6 FAM 1941.3)
incitement of terrorism - Incitement with intent to cause bodily harm renders an alien inadmissible under INA if he or she has incited terrorist activity under circumstances indicating an intention to cause death or serious bodily harm. Incited in the context of INA is speech that induces or otherwise moves another person to undertake terrorist activity. Normally speech will not rise to the level of inciting unless there is a clear link between the speech and an actual effort to undertake the terrorist activity. It connotes speech that is not merely an expression of views but that directs or induces action, typically in a volatile situation. The applicant may have incited terrorist activity even if a terrorist attack does not actually occur (e.g., because an attempt to commit such activity was thwarted). An applicant who has incited terrorist activity must also have acted in circumstances indicating an intention to cause death or serious bodily harm to be inadmissible under INA. In other words, the aliens speech must not only have induced others to undertake terrorist activity, but it	(SOURCE - DOS/ USAID, FAM, 9 FAM 302.6-2)

must also have been made with the specific intent that such activity would result in death or serious bodily injury. Incitement and the requisite intent to cause bodily harm could be inferred in the following situations - (a) Widespread opposition to Country A's policies and actions lead to a series of protests, some violent, outside Country As embassy in Country B. The applicant goes to the embassy, stands on a box, and shouts to the crowd to join him in standing up to Country A and humiliating it. Shortly afterwards, when he sees an embassy vehicle approaching, he yells - Don't let them in! Make them pay for what they have done! The crowd blocks the car and removes occupants (including a diplomat working at Country As embassy), from the car, beating them severely and taking them hostage. Analysis - Diplomatic hostage-taking and violent attacks on diplomats are terrorist activities. Given the aliens urging the crowd to stop the embassy vehicle and make them pay, you would have reasonable ground to believe that the applicants speech incited terrorist activity. The aliens make them pay statement, when viewed against the backdrop of previous violent protests and his general comments about standing up to Country A and humiliating it, would provide you with reasonable ground to believe that the applicant intended to cause death or serious bodily harm. (b) The applicant is an ardent nationalist whose opinions voiced to a particular audience regularly blame foreigners for his country's problems and who argues that the only solution to these problems is that foreigners should be driven out of the country. Press reports say that some of those in the targeted audience have been purchasing weapons and seeking to obtain and manufacture explosives. Police notify the applicant or those associated with the applicant that they are investigating several of those in the targeted audience for weapons-related offenses. At the end of a week of particularly strong anti-foreign sentiment, the applicant gives a special speech entitled A Call to Action. With the knowledge that those under investigation are in the audience, the applicant begins his speech with - The time has come for action! He then reiterates throughout his speech that The only solution to the country's problems is to purge our great land of these foreigners once and for all through whatever means necessary. Shortly thereafter, some of those in the target audience detonate a truck bomb outside a restaurant frequented by foreign nationals, killing several foreign nationals and injuring many restaurant employees. Analysis - The use of any explosive with intent to endanger, directly or indirectly, the safety of one or more individuals or to cause substantial damage to property is a terrorist activity. In the example, the applicant helps foster anti-foreign sentiments and then, during a particularly tense period, urges students to act to drive foreigners from the country through whatever means necessary. Under these circumstances, you would have reasonable ground to believe that the applicants speech incited terrorist activity. The fact that the applicant knew that several students likely had access to weapons and/ or explosives and that those students were in attendance at his special lecture would provide you with reasonable ground to believe that the applicant intended to cause death or serious bodily harm.

inherently governmental function - as a matter of policy, a function that is so intimately related to the public interest as to mandate performance by Government employees. This definition is a policy determination, not a legal determination. An inherently governmental function includes activities that require either the exercise of discretion in applying Government authority, or the making of value judgments in making decisions for the Government. Governmental functions normally fall into two categories: the act of governing, i.e., the discretionary exercise of Government authority, and monetary transactions and entitlements. (1) An inherently governmental function involves, among other things, the interpretation and execution of the laws of the United States so as to— (i) Bind the United States to take or not to take some action by contract, policy, regulation,	(SOURCE - GSA/ DOD, FAR, VOL I CH A)

authorization, order, or otherwise; (ii) Determine, protect, and advance United States economic, political, territorial, property, or other interests by military or diplomatic action, civil or criminal judicial proceedings, contract management, or otherwise; (iii) Significantly affect the life, liberty, or property of private persons; (iv) Commission, appoint, direct, or control officers or employees of the United States; or (v) Exert ultimate control over the acquisition, use, or disposition of the property, real or personal, tangible or intangible, of the United States, including the collection, control, or disbursement of Federal funds. (2) Inherently governmental functions do not normally include gathering information for or providing advice, opinions, recommendations, or ideas to Government officials. They also do not include functions that are primarily ministerial and internal in nature, such as building security, mail operations, operation of cafeterias, housekeeping, facilities operations and maintenance, warehouse operations, motor vehicle fleet management operations, or other routine electrical or mechanical services.
